

Select2 has replaced Chosen in Tiki23

## Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

Enable the feature

You can enable the feature in:

**Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu**

The screenshot shows the Tiki23 Admin panel with the 'Interface' tab selected. The 'jQuery plugins and add-ons' section is expanded, showing various plugins and their status. The 'jQuery UI Theme' is set to 'flick'. In the 'Experimental' section, the 'jQuery-ui Chosen Menu' checkbox is checked and highlighted with a red box. Other experimental features like 'jQuery Infinite Carousel' and 'jQuery Sortable Tables' are also visible. The 'Mobile' section shows 'Mobile Access' is disabled. An 'Apply' button is at the bottom.

Global features	Interface	Programmer	No Tabs
<b>Ajax</b>			
<input checked="" type="checkbox"/> Ajax			
<input checked="" type="checkbox"/> Ajax auto-save			
<b>jQuery plugins and add-ons</b>			
<input checked="" type="checkbox"/> Autocomplete			
<input checked="" type="checkbox"/> jQuery Media			
<input checked="" type="checkbox"/> Superfish			
<input checked="" type="checkbox"/> Reflection			
jQuery UI Theme: flick			
<input checked="" type="checkbox"/> Tooltips			
<input checked="" type="checkbox"/> JQuery UI			
<input checked="" type="checkbox"/> Validation			
<b>Experimental:</b>			
<input type="checkbox"/> jQuery Infinite Carousel			
<input checked="" type="checkbox"/> jQuery Sortable Tables			
<input checked="" type="checkbox"/> jQuery-ui Chosen Menu			
<input type="checkbox"/> jQuery-ui Select Menu			
<b>Mobile</b>			
<input type="checkbox"/> Mobile Access			
You need to set Perspectives			

Apply

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

## Features

The screenshot shows the 'Preference Filters' section in the Tiki23 Admin panel. It has four checkboxes: 'Basic' (checked), 'Advanced' (checked), 'Experimental' (checked), and 'Unavailable' (unchecked). A 'Set as my default' button is to the right.

Preference Filters			
<input checked="" type="checkbox"/> Basic	<input checked="" type="checkbox"/> Advanced	<input checked="" type="checkbox"/> Experimental	<input type="checkbox"/> Unavailable

Set as my default

## Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

**Subject \***

*Subject or short summary of the issue (max 255 characters)*

**Importance**

*10: Popular feature request, no problem, no workaround on default install 5: Minor annoyance, stop people from working 1: Edge case or rare problem, no workaround*

**Easy to solve?**

*10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours of work 1 Difficult: Requires days of work*

**Feature**

**Category \***

*Category of the issue*

**Tiki Version** ☐ 10.x ☐ 11.x

Click to expand

## Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

**Easy to solve?**

*10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work*

**Feature**

**Category \***

*Category of the issue*

**Tiki Version** ☐ 8.x ☐ 9.x

Click to expand

## Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your

typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a \*.tiki.org site.

Easy to solve?

5

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work
