

This was an experimental feature that was [removed](#) because it never reached maturity. A new approach is in development: <https://profiles.tiki.org/Timesheets>

Timesheet

Added in [Tiki9](#), Timesheet allows to track time spent on different tasks and projects. It uses a special [jQuery](#) plugin called jTrack, which allows to have time counters on even if the user closes the browser or logs out for some reason. It is a very useful feature for project management, in which workers are expected to record the time spent on different tasks.

More information to come... [stub](#)

The screenshot shows the Tiki Wiki CMS Groupware interface. The header includes the Tiki logo and a 'LOG OUT' button. The left sidebar contains a 'Menu' with links to Home, Wiki, File Galleries, Spreadsheets, Trackers, Admin, and TimeSheet. The main content area is titled 'Time Tracker' and has tabs for 'Local Cache (Not Committed)' and 'Saved (Committed)'. It displays a list of tasks with columns for date, description, and time. The tasks are:

Date	Description	Time
14.10.2011	testing timesheet from robert in trunk	0:08:48
14.10.2011	Email	1:01:35
14.10.2011	Another email box tralari-tralara through thunderbird also	0:03:59
14.10.2011	screenshotting timesheet for robert and marc	0:00:00
