# **Blogs Config**

## **Admin Access**

To access administration, go to Home Page and, on the Menu, click on "Admin (click!)".

## **Sections: Tiki Admin Panel**

You will access the Sections Tiki Config Panel, as shown in this graphics:

# **Blog settings**

From the Tiki Config Panel, click the Blogs icon to display its settings panel, the top of which appears like so:

### **Home Blog (main blog)**

The Home Blog will have the following properties:

- If not selected it will default to the first blog created.
- It's where you go if you click on blogs in the main menu (without expanding the menu).
- It's where you go as the home page if you select the home page to be a blog (in the general settings).

#### **Blog features**

Enable/disable rankings/comments and you can select which is the Home Blog.

#### **Blog listings configuration**

#### **Blog comments settings**

#### **Blog Archives**

You can see the blog archives using the module months links, which will also allow you to see links for other years posts.

Archives July 2010 (1) June 2010 (4) May 2010 (3) April 2010 (2)	Archives Juillet 2010 (1) Juin 2010 (4) Mai 2010 (3) Avril 2010 (2)	Архивы Июль 2010 (1) Июнь 2010 (5) Апрель 2010 (1)
	Module shown when <b>French</b> is selected as language	Module shown when <b>Russian</b> is selected as language

Note that the number of blog posts per year can vary depending on the language

In order to have this module configured, you have to add some paramters as in the screenshot below:

Right Modules							
Name	Order	Cache	Rows	Parameters	Groups	Action	
last_blog_posts	2	0	10	title=Latest+Comments&nonums=y	Anonymous	<b>⊘ ∼ ×</b>	
months_links	31	0	10	feature=blogs&id=1⟨=en&title=Archives	Anonymous	<b>⊘</b> ▲ ▼ ← X	
months_links	32	0	10	feature=blogs&id=2⟨=fr&title=Archives	Anonymous	<b>⊘</b> ▲ ▼ ← X	
months_links	33	0	10	feature=blogs&id=3⟨=ru&title=Архивы	Anonymous	<b>⊘ △ ← X</b>	

So this way, each language can have a module specific for that language, showing the posts of that blog (one blog per language), for a given time frame, specified in the parameters of the module definition.

In addition, you can show blog posts between two dates in a wiki page using the Blog list plugin, with the parameters for start date and end date.
