

How to make menu items open in a new window.

This method uses some jquery. There is an alternative method described at [Menu](#)

Insert the following code at the bottom of templates/footer.tpl (which is a convenient place to put it).

The option item that you want to open in a new window in the following example is 1318, corresponding to option ID 1318 in admin [menus](#)

```
{jq} $('option1318 a').click( function() { window.open( $(this).attr('href') ); return false; }); {/jq}
```

You can specify multiple options to be affected as follows (in this case option 1315 and 1318)

```
{jq} $('option1318 a,.option1318 a').click( function() { window.open( $(this).attr('href') ); return false; }); {/jq}
```
