## Overview

Set up Intertiki Server (Master) Sites using this tab

## To Access

From the [Intertiki](#) page, click the **Intertiki server** tab.

## Note

*set up the Intertiki Slave using the associated Intertiki client tab*

- [Login](#)
- [External Authentication](#)
- [Multitiki](#)
- [InterTiki](#)

The screenshot shows the 'Intertiki server' configuration page. At the top, there are two tabs: 'Intertiki client' (selected) and 'Intertiki server'. Below the tabs are several configuration options:

- 'Intertiki shared cookie for sliding auth under same domain': A checkbox.
- 'Intertiki Server enabled': A checkbox.
- 'Access Log file': A text input field.
- 'Errors Log file': A text input field.
- 'Known hosts': A table with columns 'Name', 'Key', 'IP', and 'Contact'. A 'New:' row is present with four input fields.

A 'Save' button is located at the bottom right of the form area.

Intertiki server tab

Setting	Description	Default
<b>Intertiki Server Tab</b>		
Intertiki shared cookie for sliding auth under same domain:	When enabled a user who logs into or out of any site(slaves or master) is automatically logged into or out of all other sites. (note: feature <i>rememberme</i> must be enabled).	
Access Log file:	Name of file where you want Access Logs to be stored	
Errors Log file:	Name of file where you want Error Logs to be stored	
<b>Known Hosts (New):</b>		
Name:	Set the name (label) to use for your client (Slave) server	
Key:	This field must match the shared key entered in the Client's (Slave) key field for this server	
IP:	IP address of the Client (Slave) server. If unsure Ping it by domain name	
Contact:	Not used by Tiki, but enter any information which might be valuable
