

# Module breadcrumb

This module displays the most recently visited [wiki pages](#), in reverse chronological order, and provides a link to each page.

## Parameters

Displays the last Wiki pages visited by the user.

[Go to the source code](#)  
*Preferences required:* feature\_wiki

| Parameters     | Accepted Values | Description                                                           | Default | Since |
|----------------|-----------------|-----------------------------------------------------------------------|---------|-------|
| maxlen         | int             | Maximum number of characters in page names allowed before truncating. |         |       |
| show_namespace |                 | Show namespace prefix in page names. ( y / n )                        | y       |       |

## Example

*This code:*

```
{MODULE(module=breadcrumb) /}
```

*Would produce on this site:*  
The assigned module looks like this:
