

# Plugin A Link

This [wiki plugin](#), available since Tiki1, creates a link to an anchor in a wiki page. Use in conjunction with [PluginAname](#), which creates the anchor, or link to a wiki heading.

## Parameters

Create a link to an anchor

*Introduced in Tiki 1. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* wikiplugin\_alink

| Parameters       | Accepted Values | Description  | Default | Since |
|------------------|-----------------|--|---------|-------|
| (body of plugin) |                 | Anchor link label.   |         |       |
| <b>aname</b>     |                 | The anchor name as defined in the Aname plugin.  |         | 1     |
| pagename         | pagename        | The name of the wiki page containing the anchor. If empty, the anchor name will be searched for on the wiki page where the plugin is used. |         | 1     |

## Example

### Aname Plugin Usage

```
{ANAME() }
```

anchorname <--put the name of the anchor here. Use this same name for the aname= parameter in the Plugin Alink (see just below).

```
{ANAME}
```

ANAME example: {ANAME() }anchorname{ANAME}

### Alink Plugin Usage

```
{ALINK(
```

aname=anchorname <-- put here the name of the anchor you created using the Plugin Aname!

```
)}
```

link text <-- put here the text to appear as the link.

```
{ALINK}
```

ALINK example: {ALINK(aname=anchorname)}link text{ALINK}

## Demonstration

To jump down to the anchor at the bottom of the page click [HERE](#). <-- Here is where I put the ALINK plugin in this page.

.  
. .  
. .  
. .  
. .  
. .  
. .

Here is a second [link](#) to the same anchor at the bottom of the page. Again, I used the ALINK plugin.

**The anchor is here.** <-- I put the ANAME plugin at the beginning of this line. Now you can click [HERE](#) to jump to the anchor I put at the top of the page (you can't see where that one is unless you look into the page editor [])
