Plugin Google Doc

This wiki plugin, introduced in Tiki3, allows you to include a document from the Google Docs service in a page.

Parameters

Display a Google document
Introduced in Tiki 3. Required parameters are in **bold**.
Go to the source code
Preferences required: wikiplugin_googledoc

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Leave this empty.		
key	text	Google doc key - for example: `pXsHENf1bGGY92X1iEeJJI`		3.0
type	(blank) document slides spreadsheet forms drive	Type of Google document		3.0
name	text	Name of iframe. Default is "Frame" + the key		3.0
url	url	The URL of the file on Google Drive		24.0
height	digits	Height in pixels or %	400	3.0
marginheight	digits	Margin height in pixels		3.0
marginwidth	digits	Margin width in pixels		3.0
width	digits	Width in pixels or %	800	3.0
align	(blank) top middle bottom left right	Position of frame on page		3.0
editLink	(blank) top bottom both	Choose whether to show an edit link and set its location		3.0
frameborder	(blank) 1 0	Choose whether to show a border around the iframe	0	3.0
scrolling	(blank) yes no auto	Choose whether to add a scroll bar		3.0

size	(blank) small medium large	Size of frame. Use instead of width and height. The sizes will fit the Google presentations sizes exactly.	3.0

Google Key

The most important parameter is the Google key. One way to find it is, on your documents list, click-right and go to "Get Link". You will see an URL to share your document. This URL contains the Google document key and you need to copy it to the plugin.

IE (the key is in red colour):
https://docs.google.com/forms/d/1fqq6Uq8fwhTV7mvt5iy_dkUE6MtLGJRCk37VKJQNzTI/edit?usp=sharing

Note that on the same modal dialog you will be able to see who has right to see the document.

Examples

Basic syntax

```
{googledoc key="pXsHENf1bGGY92X1iEeJJI" type="spreadsheet" name="docFrame1" width="400" height="500"
align="middle" frameborder="0" marginheight="5" marginwidth="5" scrolling="yes" editLink="both"}
```

In case you select drive the key is not required, but you must provide the Google Drive link of your file.
Note that type drive does not support *documents*, *spreadsheets*, *forms*, or *slides*, better to select a type that meets the requirements.

```
{googledoc key="pXsHENf1bGGY92X1iEeJJI" type="drive" name="docFrame1"
url="https://drive.google.com/file/d/1fqq6Uq8fwhTV7mvt5iy_dkUE6MtLGJRCk37VKJQNzTI/view" scrolling="yes"}
```
