

PluginTikiManager

New in [Tiki25](#), this [wiki plugin](#) permits to use the [Tiki Manager Package](#) from any text area (typically a wiki page). Combined with [Permissions](#) and tools like [PluginGroup](#) or [PluginTrackerIf](#), it permits to present a tailored experience to each user.

The typical use case is to track a list of Tiki-powered sites, with additional actions on these instances. For example, clone production to testing, in a context of [Configuration Management and Systems Orchestration](#). See also: [Tiki Manager Tracker Field](#) and development ideas: [Tiki Manager within Tiki](#).
