

# Shadow Layer tab

Related Topics

## Overview

Use this tab to select your Tiki theme and options, and other template configurations.

- [Tiki Themes](#)

## To Access

From the [Look and Feel Admin](#) page, click the **General Layout Options** tab.

## Note

You must have your 'site layout' set to classic in order to see this tab. These options are for legacy support only.

## Look & Feel

The screenshot shows the 'Look & Feel' administration interface. At the top, there is a navigation bar with tabs: Theme, General Layout, Shadow layer (which is highlighted in blue), Pagination, UI Effects, Customization, and a 'No Tabs' button. Below the navigation bar, there is a section titled 'Miscellaneous'. Under this section, the 'Shadow layer' tab is selected, displaying various configuration options for different shadow layers. Each option consists of a label and a large, light-pink input field with a scroll bar. The labels include: Main shadow start, Main shadow end, Header shadow start, Header shadow end, Middle shadow start, Middle shadow end, Center shadow start, Center shadow end, Footer shadow start, Footer shadow end, Module (box) shadow start, and Module (box) shadow end. To the right of these input fields is a small 'Apply' button.

| Option                    | Description   |
|---------------------------|---|
| Shadow layer              | This is a legacy but useful option that activates extra divs in the site layout template file that can be used for styling purposes. Not all site layout templates (selected under the "Theme" tab) support this feature. |
| Main shadow start         | The tag <div id="main-shadow"> and the contents of this textarea are placed just below the top of the HTML body   |
| Main shadow end           | The closing tag of id="main-shadow" and the content of this textarea are placed just before the body closing tag.   |
| Header shadow start       | The tag <div id="header-shadow"> and the contents of this textarea are placed just before the page-header divs.   |
| Header shadow end         | The closing tag of id="header-shadow" and the contents of this textarea are placed just after the page-header divs.   |
| Middle shadow start       | The tag <div id="middle-shadow"> and the contents of this textarea are placed just before the middle of the page divs.  |
| Middle shadow end         | The closing tag of id="middle-shadow" and the contents of this textarea are placed just after the middle of the page divs.  |
| Center shadow start       | The tag <div id="center-shadow"> and the contents of this textarea are placed just before the center-column div.  |
| Center shadow end         | The closing tag of id="center-shadow" and the contents of this textarea are placed just after the center-column div.  |
| Footer shadow start       | The tag <div id="footer-shadow"> and the contents of this textarea are placed just before the page footer div.  |
| Footer shadow end         | The closing tag of id="footer-shadow" and the contents of this textarea are placed just after the page-footer div.  |
| Module (box) shadow start | The tag <div class="box-shadow"> and the contents of this textarea are placed just before each module div (a module in Tiki parlance is a container like a Bootstrap panel).  |
| Module (box) shadow end   | The closing tag of class="box-shadow" and the contents of this textarea are placed just after each module div.  |
