The Tiki spreadsheet feature was added to Tiki in 2004 (version 1.9) using Tiki specific PHP and JavaScript code. Starting in Tiki5, the Tiki spreadsheet front-end was upgraded to use jquery.sheet for a much nicer interface, and more features. It worked well for years, and eventually, jQuery.sheet was renamed to WickedGrid. However, WickedGrid has been inactive for years so we need to switch to one of the many impressive modern alternatives. If you would like to help with this, we are looking for financial sponsors and/or volunteer developers. And later, testers. Please contact Marc Laporte.

This page should merge with Spreadsheet

Spreadsheet using jQuery.sheet

The Spreadsheet feature can be be accessed through the jquery.sheet interface, added to Tiki since version 5.0

A review of jQuery.Sheet

Light years beyond other solutions at least as first impression, jQuery.sheet by Robert Plummer is a really wonderful library.

Usage

When adding a new spreadsheet, the interface is as usual in Tiki5: you have the option to allow wiki parsing of wiki content inside the spreadsheet, plus defining some parent relationship with other spreadsheets:

Spreadshe	ets 🛛
Edit this she	eet: Shopping list
Create New Sheet	
Title:	Shopping list
Description :	List of things to buy or exchange
Class Name:	default
Header Rows:	1
Footer Rows:	0
Wiki Parse Values:	
Categorize	No categories defined Admin Categories 🎤
Creator:	admin 🗾
Parent SheetId:	None Makes this sheet a "child" sheet of a multi-sheet set Coming soon Save

When editing the spreadsheet, you can add more rows and columns, add content to them, move among the cells using the cursor keys, etc. If wiki parsing was enabled for the spreadsheet, then you can add any wiki syntax to the cell (including Wiki plugins!)

с	D
ty Price (€/kg	g) Cost
0.5	2.5
0.3	0.899999999999999999
0.25	0.25
0.333333333333	333330.66666666666666666
	ty Price (€/kg 0.5 0.3 0.25 0.33333333333

That wiki markup will be parsed when saved.

Shopping list 🧕							
List of things	to buy or e	exchange					
Vegetables	Quantity	Price (€/kg)	Cost				
Tomatoes	5	0.5	2.5				
Carrots	3	0.3	0.899999999999999999				
Lettuce	1	0.25	0.25				
Aubergine	2	0.33333333333333333333	0.6666666666666666				
List Sheets	Edit	lo parse History Ex	port Import Graph				

New sheets can be added when clickling at the plus sign ("+") at the bottom of the spreadsheet.

The page at http://localhost says: What size would you like to make your spreadsheet? Example: '5x10' creates a sheet that is 5 columns by 10 rows. 5x10 5x10 OK	
?	What size would you like to make your spreadsheet? Example: '5x10' creates a sheet that is 5 columns by 10 rows.
	5x10
	🔇 Cancel 🗸 OK

Then, this new sheet is added to the workbook.

- Tiki5

Tiki6 features

A lot of work has happened from Tiki5 to Tiki6,

- Fill down, fill right
 - including formulas which update
- colors of cell and text
- Copy-paste from Excel
- Make cells referencing variable names

• Done - through use of calculations engine function CELLREF (example: "=CELLREF('mycell')"), but you must first set the cell's name using jQuery.sheet.instancei.setCellRef()

- Remember columns size
- Added startup option "minSize: {rows: 15, cols: 5}" and fn "checkMinSize" that will automatically add columns/rows
- Merge & unmerge cell
- Better error reporting (ex.: if a formula has a loop)
- Uses AJAX for smoother user experience
- PluginSheet
 - $\circ~$ Show a range of cells (or single cell). Default shows all. e.g. "D1:F3" (or "e14:e14")
 - This allows using in a wiki page the result from a spreadsheet cell! (that's going to be very powerful for dynamic reports in wiki pages, not only of graphs but also from specific results from calculations). Budgets for projects, shown in wiki pages dynamically, etc. Templates of invoices, etc.
 - Now handles multisheet
- The project plugin "jsanalysis" was dropped due to license issues, but it has been migrated those same functions to a new library for sheet: "jquery.sheet.advancedfn". Thus, we can now use this in the future for more advanced functions used in sheet for those users who need them. List of functions included:
 - 0 66

FACTORIAL: jQuery.factorial, COMBINATION: jQuery.combination, PERMUTATION: jOuery.permutation, GAMMA: jQuery.gamma, PRECISION: jQuery.precision, MINIMUM: jQuery.minimum, MAXIMUM: jQuery.maximum, MEAN: jQuery.mean, SUM: jQuery.sum, MODE: jQuery.mode, MEDIAN: jQuery.median, QUARTILES: jQuery.quartiles, VARIANCE: jQuery.variance, MEANDEV: jQuery.meandev, STDEV: jQuery.stdev, COVARIANCE: jQuery.covariance, CORR COEFF: jQuery.corr coeff, UNIFORM: jQuery.uniform, BINOMIAL: jQuery.binomial, BINOMIALCDF: jQuery.binomialcdf, NEGBIN: jQuery.negbin, NEGBINCDF: jQuery.negbincdf, *HYPGEOM: jQuery.hypgeom,* HYPGEOMCDF: jQuery.hypgeomcdf, EXPONENTIALCDF: jQuery.exponentialcdf, POISSON: jQuery.poisson,

History: sheet differences shown

Since Tiki6 spreadsheets versions can be compared showing easily differences between any pair of versions: pink background for deleted content, green background when new content has been added, and prepending a "+" sign for the new text added, and a negative "-" sign for text deleted.

Example:

Sheet in edit mode, showing the new toolbar specific from the spreadsheet feature:

2	009s T	ime	elin	ie (0									
Tir	neline of actio	ons foi	r the E	Enviro	nmei	ntal Actio	on Pla	n fron	the .	2009	Spring	cou	rse	
N	IENU 🐏 😫	1		1			8	3 8	В	I S	- =	@	0	炎 📀 🧶
	B6													
	Α	В	С	D	E	F	G	н	I	J	К	L	м	N
1	а													
2	Action code	1	2	3	4	5	6	7	8	9	10	11	12	Comments
3	WATER													
4	W1	x				ххх	ххх			x				Install timers and/or d
5	W2					ххх								Immediate installatior

When you click in the "History" button below each spreadsheet when it is in view mode, you are shown a table to choose which versions you want to compare:

Then, after you select any pair, you can click on "compare", and you can see the differences between those two versions of the same spreadsheet:

Image: state in the state	A	В		с	1	A	В	c	:	
2 Action code +1 +2 + 3 Action code 1 2 3 +WATER - - 4 Action code 1 2 4 W1 x - 2 5 WATER -	1					1 +a				Π

Note that scrollbars will be locked together to ease navigation on them both synchronized on the same columns at the sme time with a single scrollbar movement.

New syntax for formulas

You can use some formulas like in OOo Calc or MS Excel, using slightly different syntax (because the JQ Spreadsheet is using Javascript for the formulas):

```
=IF(E10=="Y",695,IF(E10=="N",495,"ERROR"))
```

or like this

```
= IF(SHEET1:E10 == \& quot; N \& quot;, 0.08, IF(SHEET1:E10 = \& quot; Y \& quot;, 0.25, \& quot; ERROR \& quot;))
```

Aliases:

• Spreadsheet Jquery | Spreadsheet jquery.sheet | jquery.sheet
