

# Theme Generator

The goal of this feature is to make it easier to make a custom theme without special training and special software. All point & click, in the browser.

## Brosho CSS Assistant

New in [Tiki6](#).

Brosho is a [jQuery](#) plugin which helps you edit your CSS, directly in the browser.

<http://demos.usejquery.com/brosho-plugin/>

Visit `tiki-admin.php?page=look` and pick "Custom CSS" tab.

1. Activate CSS Assistant
2. Mouse-over and click the item (ex.: image, text, menu, etc.) you want to style
3. Enter CSS (ex.: background: yellow;) and you will see the result in real time.
4. Click "Copy" to Copy to Custom CSS
  - o Custom CSS overrides CSS (that's the Cascading part!)

## Drag & drop layout builder

New in [Tiki7](#).

All elements in the site layout (logo, login box, site title, etc.) are now positioned via drag & drop.

To use, visit `tiki-admin_modules.php`

Background info: [Modules Revamp](#)

## Color, Borders and Typography picker

New in [Tiki7](#).

**Colors:** Foreground Colors, Background Colors

**Borders:** Border Colors, Border Widths, Border Styles, Border Radii

**Typography:** Font Sizes, Line Heights

This simple interface will let you override CSS.

Visit `tiki-admin.php?page=look` and pick "Theme Generator" tab.
