

Tiki10

To check all the commits in this branch, see: <https://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/10.x/changelog.txt>

Tiki 10.x was released on 2012-12-19, and is supported until 11.1 is released

Even though it's just after a Long Term Support version and there are quite a few new features, there are relatively few major structural changes that will make upgrades difficult or cause regressions. See [Roadmap](#) and [Tiki10](#)

Since [PHP 5.2](#) started in November 2006 and [PHP 5.2.x](#) reached end of life in December 2010, which is two years before the release of Tiki10, the requirements are PHP 5.3.x

If you require pre-5.3 support, you can use [Tiki9](#) which is a [Long Term Support](#) version.

1.1. Batch Upload

It is now possible to integrate very large files into the Tiki File Gallery using Batch Upload. See [Batch Upload](#) for details.

1.2. BigBlueButton

- It is now possible for admins to delete recordings
- New explicit permission `tiki_p_bigbluebutton_view_rec` needed to view recordings:
 - `tiki_p_bigbluebutton_view_rec` is no longer implicit if `tiki_p_bigbluebutton_join` is granted

1.3. Check

1.3.1. Check Permissions

[Permission Check](#): If Tiki installer and `tiki-check.php` fail, Tiki Permission Check can be used to figure out some details about filesystem permissions needed by the webserver to make those ones work.

1.3.2. Check Server

- `tiki-check.php` checks the server is appropriately configured for Tiki. See: [Server Check](#)

1.4. Code Review

- Many feature enhancements to take it to [Dogfood](#) level. See [Code Review](#) and code.tiki.org

1.5. Comments and Ratings

- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42557>

1.6. Cookie consent

See [#European_Cookie_compliance](#) below

1.7. Draw

- It is now possible to restrict which tools are available in SVG-edit, thus offering a simplified experience. See [Draw](#)

1.8. European Cookie compliance

See [Cookie Consent](#), to comply with "EU Privacy and Electronic Communications Regulations."

1.9. File Gallery: native indexing of .docx, .xlsx and .pptx

- [Search within files](#)
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=43228>

1.10. File Gallery: batch upload improved

See [#Batch_Upload](#)

1.11. File Gallery: Page View

New "Page View" added for images, which shows database and metadata information for each image.

1.12. Forum deliberations

- [Deliberation](#)
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42583>

1.13. HTML5

In each version, we progressively take advantage of HTML5, such as footer, article, article elements and header elements.

- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42442>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42443>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42444>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42445>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42446>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42447>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42448>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42449>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42450>
- <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42451>

1.14. Kaltura

- [Kaltura](#) support has been revamped to be much easier to setup and [PluginKaltura](#) has several new parameters.
- Please see a screenshot of the new interface here: <http://tv.tiki.org/Add+a+Webcam+recording>

```
{* kaltura id="1_cv33i4xj" *}
```

1.15. Mail Queue

There is a new feature to place all notification email messages in a queue, and send all those emails periodically through a [Cron](#) job using `./sendmail.php` script.

This requires setting up mail delivery with a SMTP server instead of just sendmail, and set it to use a Queue.

See [Admin home > General > General Preferences > Mail](#)

Mail

Default charset for sending mail: ⓘ

Mail end of line: ⓘ

Mail Sender: ⓘ

SMTP Server:

Authentication: ⓘ

These values will be stored in plain text in the database:

Username:

Password:

Port:

Security:

Local server name: ⓘ

Mail Delivery: ⓘ

Email to send a test mail:

Email footer: ⓘ

Click to expand

See [Mail Queue](#)

1.16. Maps

- [OpenLayers](#) upgraded to 2.12
- Added MapQuest Open tilesets
- And many many other fixes and improvements which were made for the [CartoGraf project](#), an interactive web-based mapping application to enhance learning in history and geography classes in high schools. CartoGraf is mainly based on [Maps](#), [Drawings](#), [PluginAppFrame](#) and [Trackers](#). This is a great example of how to use [profiles](#) to use a general purpose app (Tiki) to make a very specific application (CartoGraf).

1.17. Menu

See [#Structures_Drill_Down_menu](#)

1.18. Modules

- Option to load the modules from a static files (in profile YAML format like <http://profiles.tiki.org/Module+Handler>)

You can use this from admin -> profiles -> export

1.18.1. Facebook module

- NEW: [Module facebook](#) to show Facebook wall (messages and stories) of a Tiki user

1.18.2. Twitter module

- NEW: [Module twitter](#) to show public/friends Twitter timeline

1.19. Namespaces

Namespaces have been added, in order to facilitate the creation of different workspaces with common page names, for instance, among them (aka: "Introduction", "About", "Team memmbers", etc).

See [Namespaces](#)

1.20. Permission Check

See [#Check_Permissions](#)

1.21. Plugins

1.21.1. PluginSign

- New: [PluginSign](#)

1.21.2. PluginInsert

- New: [PluginInsert](#)

1.21.3. PluginProposal

- [PluginProposal](#): Added the ability to set custom weights to groups in the proposal plugin, which affects the stored attributes. This is useful for [Code Review](#)

1.21.4. PluginTrackerCalendar

It allows managing tracker items as resources in a calendar view: i.e. it uses [FullCalendar ResourceViews](#) to render the content of a tracker. The feature is not using the Tiki feature Calendar, so that you don't need to have "Calendar" feature enabled for this plugin to display data in a calendar view.

The screenshot shows the TrackerCalendar plugin interface. At the top, it says "HomePage" and "This is a test for the feature TrackerCalendar: http://doc.tiki.org/PluginTrackerCalendar". Below this is a navigation bar with buttons for "today", "Aug. 19 — 25 2012", and view options: "month", "week", "day", "resource day", "resource week", and "resource month". The main area is a calendar grid for August 2012, with columns for Sun 8/19, Mon 8/20, Tue 8/21, Wed 8/22, Thu 8/23, Fri 8/24, and Sat 8/25. The calendar contains several events represented by colored boxes with text labels:

- "A really awesome past event" (orange box, Thu 8/23)
- "CSS Preprocessor - Bootstrap" (yellow box, Thu 8/23)
- "Improvements to Community currency support in Tiki: Tiki User Credit?" (green box, Fri 8/24)
- "Meeting time at the Building entrance" (yellow box, Wed 8/22)
- "Official end of the TikiFestBarcelona3 Performance Analysis Resource management (fullcalendar)" (yellow box, Thu 8/23)
- "Short phpstorm install-tutorial." (green box, Thu 8/23)
- "Spam fight management" (green box, Tue 8/21)
- "Start of the TikiFest" (pink box, Thu 8/23)
- "test t3-item82" (yellow box, Thu 8/23)
- "test t3-item97" (yellow box, Thu 8/23)
- "test t3-item98" (blue box, Mon 8/20)
- "12atest" (blue box, Mon 8/20)
- "10-16atest t3-item97" (green box, Sat 8/25)
- "12a really awesome past event" (orange box, Thu 8/23)
- "2a really awesome past event" (orange box, Thu 8/23)
- "2aImprovements to Community currency support in Tiki: Tiki User Credit?" (green box, Fri 8/24)
- "12aReso management (fullcalen)" (green box, Thu 8/23)
- "2aShort phpstorm install-tutorial." (green box, Thu 8/23)
- "2aSpam fight management" (green box, Tue 8/21)
- "12aStart of the TikiFest" (pink box, Thu 8/23)

Click to expand

See [PluginTrackerCalendar](#) and the profile to easily add a working example in your site:
http://profiles.tiki.org/Tracker_as_Calendar_10

1.21.5. PluginTrackerQueryTemplate

It allows to generate forms from a tracker. Currently only able to list data, the TrackerQueryTemplate plugin simply obtains data from a tracker and allows an editor the ability to list the tracker data as he sees fit.

See [PluginTrackerQueryTemplate](#)

1.22. References

[References](#) implements local references in Tiki. Tiki also has support for [Zotero](#) references, but they are stored externally on the Zotero server.

1.23. Screenshot

This permits to capture your screen and upload to Tiki.

- Still image
- or Video with sound

This is thanks to the inclusion of the [jCapture applet](#) in Tiki.

See: [ScreenCast](#)

1.24. Search

1.24.1. Lucene Search

Search results 'Default where' parameter changed from a single select drop down selector to a multiple checkbox selection so that custom 'mixes' of content types can be included in search results

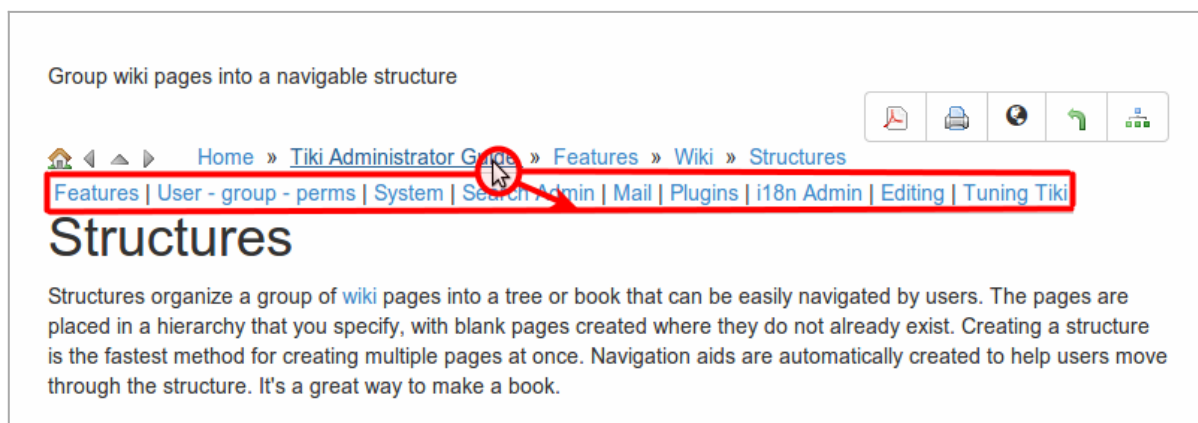

Search results can now be sorted (asc or desc) by: Relevance (default); Title; Modified date; or Visits

1.25. Server Check

See [#Check_Server](#)

1.26. Structures Drill Down menu

A Drill Down menu for structures has been added, so that when the user passes the mouse over a node in the line indicating the path to that node in the structure hierarchy, the names of all the children of that node will be displayed below the path to that structure node as links for easier navigation.

Click to expand

See [Structures Drill Down menu](#)

1.27. Themes

- It is now possible to set a different theme (and/or option) for admin pages to reduce the workload when creating custom themes and options
 - Admin -> Look & Feel -> Theme -> Admin Theme

1.28. User Watches

There is a new tab in the user watches preferences screen, which allows the user to request whether to receive email copies or the changes made by himself/herself to the different sections of the website. If you keep these options below unchecked, you will not receive a copy of your own changes.

User Watches and preferences

MyTiki Preferences MyInfo Messages My Watches Action Log

My watches Notification Preferences No Tabs

Tip
Use this form to control notifications about objects you are watching.

Send notification when I am the editor:

- Wiki
- Article
- Blog
- Tracker
- Calendar
- Comment

Apply

See [User Watches](#)

1.29. Version checker

- Version checker has been revamped and now deals better with LTS versions:
 - <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42539>
 - <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki?view=revision&revision=42535>

1.30. Wiki syntax change for center

Wiki syntax for centering has been by default changed from `::center::` to `:::center:::` for new installs but upgrades will continue to use the previous syntax.

Finally, we found a new syntax for new namespaces feature `:_:` and center will stay the same.

1.31. Workspace UI

There an interface to manage the creation and editing of [Workspaces](#), so that batch creation of sets of Tiki objects with custom groups and associated permissions can now be handled more easily.

See [Workspace UI](#)
