Module Search

New to [Tiki6](), this merges

- Search text (of all the site)
- Search title of wiki page
- Edit page

Parameters

Multi-purpose search module (go or edit page by name and/or search site)

[Go to the source code]()

Parameters	Accepted Values	Description	Default	Since
additional_filters		Filters to be applied to the search results, as a URL-encoded string. Ex.: catgories=1+AND+2&prefix~title=Test		
advanced_search		Use advanced (boolean) search (full text search only). Default: "y" (use advanced search)		
categId		If set to a category identifier, pages created through the module are automatically categorized in the specified category. Not set by default.		
compact		Makes the three buttons only appear on mouse-over. Default: "n"		
default_button		Action to perform on entering . Default: "search" (search|go|edit)		
edit_action		If set, send the form to the given location (relative to Tiki's root) for processing. Default: tiki-editpage.php		
edit_submit		The label on the button to submit the form. Default: Edit		
templateId		If set to a template identifier, the specified template is used for creating new Wiki pages. Not set by default.		
go_action		If set, send the form to the given location (relative to Tiki's root) for processing. Default: tiki-listpages.php		
go_submit		The label on the button to submit the form. Default: Go		
search_heading		Optional heading to display at the top of the module's content.		
legacy_mode		Setting to emulate previous behaviour. Default: "" ("search"=search_box, "page"=search_wiki_page, "quick"=quick_edit)		
search_action		If set, send the form to the given location (relative to Tiki's root) for processing. Default: tiki-searchindex.php (for Tiki search)		

search_submit		The label on the button to submit the form. Default: Search
show_edit_button		Show edit button. Default: "y" (do show edit button)
show_go_button		Show go to page button. Default: "y" (do show go button)
show_object_filter		If set to "y" shows a dropdown of sections to search. Default: "n" (no object filter)
show_search_button		Show search button. Default: "y" (do show search button)
tiki_search		If set to "y" the search performed is a "Tiki search". Default: "n" (full text search)
use_autocomplete		If set to "y" input uses autocomplete for pagenames if applicable. Default: "y" (use autocomplete)
input_size	int	Width of the text input field (in characters). Example value: 15. Default: 0 (leave automatic width)
select_size	int	Size of the Search Filter dropdown list. Default: 10

Editing the look of the Search Module:

To remove the Titles button from the module -

1. Go to Admin Modules (tiki-admin_modules.php) and add the module to your site.
2. The module config page will open.
3. Enter "n" in "Show Go Button" (looks like this became the Titles button).
4. Save.

- I also changed the name of the module to "Action" and the text of the search button to "Search". (Sorry, the tooltip disappears when you edit the module.) This leaves a Search button and an Edit button, to edit/create pages.
