

AutoLinks

When the AutoLinks option is enabled, Tiki will automatically transform any website or email addresses that you type in a wiki textarea into a clickable hyperlink.

Use AutoLinks as a shortcut for creating links with Tiki's [Wiki Syntax](#) (that is, using [http://www.tiki.org]).

AutoLink Examples

For example:

- Typing **www.tiki.org** will produce:
www.tiki.org
- Typing **http://www.tiki.org** will produce:
<http://www.tiki.org>
- Typing **info@tikiwiki.org** will produce:
info@tikiwiki.org
