

## Tiki9

To check all the commits in this branch, see:

<https://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/9.x/changelog.txt>

Tiki9 was first released on June 26th, 2012 and is a [Long Term Support](#) (LTS) version and thus will be supported until November 2015. (when Tiki 16 is released)

This is the last version which supports PHP 5.2.x. But really, PHP 5.2.x is no longer supported by PHP itself so you should upgrade to PHP 5.3 See: [Version Lifecycle](#)

Related links:

- [Roadmap](#)
- [Tiki9](#)
- Release notes are [here](#)

Development of Tiki9 started after 8.0 Beta was released. [Tiki7](#) and [Tiki8](#) were huge releases. Tiki9 is expected to be more modest because it's an LTS. [Tiki10](#) is expected to be bigger than Tiki9, but likely not as big as 7.

(alphabetically sorted)

### 1.1. Articles show similar articles based on common freetags

The [Articles](#) feature has been enhanced to show links to similar articles at the bottom of one article, based on a number of similar [Freetags](#) in common between them.

### 1.2. Batch actions

Some batch actions have been improved so that they can be run based on a url with a token access. They comprise:

See [Batch](#) and [Token Access](#)

### 1.3. Banning spammers from Action Log data

There is a new option to allow selection of multiple items shown in the action log interface, and sending that information of their ip's to the banning feature, with the minimum number of clicks to have multiple ip's banned at once:

The screenshot shows a list of recent activity entries in the Action Log. The first two entries have checkboxes checked, indicated by red circled '1'. At the bottom, a button labeled 'Ban' with a lock icon is highlighted with a red circle and labeled '2', indicating where to click to ban selected users.

User	Date	Action	Page	IP	Actions
Anonymous	00:40	Viewed	wiki	180.76.6.28	<input type="checkbox"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/>
Anonymous	00:39	Viewed	wiki	Welcome page	66.249.72.225 <input type="checkbox"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/>
Anonymous	00:38	Viewed	wiki	Welcome page	66.249.72.225 <input type="checkbox"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/>

Perform action with checked:

For more information, see [Banning](#)

## 1.4. BigBlueButton

BigBlueButton (BBB) system for audio/videoconference allows recording the meetings since BBB 0.8. Tiki nowadays can show the recordings to users without the permission to join the meeting, since a new permission `tiki_p_bigbluebutton_view_rec` has been added.

For more information, see: [BigBlueButton](#)

## 1.5. Calendar

### 1.5.1. Calendar names translatable

Calendar names are now translatable (but not individual events).

- This is useful if you have a calendar ID which has events in several languages. Ex. Training/Formations for CalendarID #4 and each event's info (ex.: name/description) can be in any language or you can make bilingual. The translation of the calendar name label is done like any other translation string in Tiki (`lang/**/language.php` or `lang/**/custom.php` or [Interactive Translation](#)). See [Calendar](#)

### 1.5.2. New interface "FullCalendar"

A new interface called "FullCalendar" in tiki has been added, which allows to edit events through drag and drop edition of items in the calendar. See [FullCalendar](#).

### 1.5.3. Calendar: new options

New options have been added to set default new events to all day, and another option to put the name of the event on each day. See [Calendars](#).

## 1.6. Cron jobs

Some webhosts don't allow users to set up cron jobs in shared hosting. To avoid this issue, Tiki9 includes another system to manage cronjob calls in a tiki site, in order to allow launching cron jobs from external servers with a special security [token](#).

See [Cron jobs](#).

## 1.7. Daily reports

[Daily reports](#) feature has been internally revamped, and has a few improvements for end users. These include improvements in internationalization of messages sent, footer added to messages, and tracker item comments are also included in the reports.

## 1.8. Draw

[Draw](#) has the ability to edit tracker files (through the tracker 'files' field) and `wikiplugin_img`. (ref r39344)

## 1.9. File galleries

### 1.9.1. Maximum displayed name converted to a preference

Maximum displayed name length a pref (default now 40)

### 1.9.2. Thumbnails with transparency (png with transparent bg supported)

Thumbnails use png image format for thumbnails if the source file is .png. This preserves transparency in thumbnails.

### 1.9.3. VCS

[File Gallery](#) include a simple version control system (VCS), which adds revision information to file versions. (Ref. r38587, r38596 in trunk)

## 1.9.4. Wiki Attachments in File Galleries fixed

There is a new preference to allow handling attachments in file galleries which is fixed in [Tiki9](#) (r38997).

## 1.10. File upload improvements in text areas (and new toolbar icon)

New icon and tool in the textarea toolbars allows for faster insertion of file in file galleries for end users, with a reduced number of clicks.

## 1.11. HtmlFeeds

Introduced in [Tiki9](#), this feature adds a way to push and pull html bits around from one site to another. See [Html Feeds](#).

## 1.12. Image directory revamp

The 3 directories for image storing (images/, img/, img/) has been consolidated under img/ directory. See details [here](#)

## 1.13. Map Improvements

Additional improvements were made on mapping support to improve the integration with OpenLayers.

- Ability to use different base layers (OpenStreetMap, Google Street/Satellite/Physical)
- Create tracker items from the map view (when using the tracker input module)
- Display search results with periodic refresh on the map using arguments on the map plugin
- Associate icon to the tracker items rendered on the map
- Improved pop-up/infobox
- Added support for Google Street View
- Added the possibility to Draw over Maps via OpenLayers tools.
- And many more.

This was done for the [CartoGraf project](#), an interactive web-based mapping application to enhance learning in history and geography classes in high schools. CartoGraf is mainly based on [Maps](#), [Drawings](#), [PluginAppFrame](#) and [Trackers](#). This is a great example of how to use [profiles](#) to use a general purpose app (Tiki) to make a very specific application (CartoGraf).

## 1.14. Menu

Some enhancements to the menu admin which include some usability improvements, separated sections into tabs, fixed "quick urls" box, added autocompletes for pages, prefs and perms, and improved preview. See [Menu](#)

From 9.2 you can also use wiki syntax (including plugins) in menu labels to allow customized formatting and special effects.

## 1.15. Modules: new and updated

### 1.15.1. module map\_edit\_features

New module, to edit features on [Maps](#) and adapt tracker input/markers to avoid internal conflicts in OpenLayers. See [Module map\\_edit\\_features](#).

## 1.15.2. module months\_links (blog and posts archive)

Improved Module. The module has been improved to display blog posts or articles grouped by months and years, and when clicking in a month, the list of posts or articles will be expanded in real time to show their titles.

## 1.15.3. module users\_own\_rank

New module, which shows the users' own rank and score in the 'My Score' module.

## 1.16. Multilingual Articles improved

Multilingual articles had some issues fixed and some interface improvements have been added

## 1.17. PDF from (jQuery.S5) Slideshow

[Slideshows](#) using jQuery.S5 allows to print the presentation in a single PDF file, using "dompdf" library, already included in Tiki9.

See [PluginSlideshow](#)

## 1.18. Plugins: new and improved!

### 1.18.1. Pending approval notification

The feature "**Plugin pending notification**" in "**Admin home > Editing and plugins > Plugins (tab)**" has been improved since its addition in [Tiki7](#). It currently sends a copy of the plugin pending approval in the email message to the admin users.

See [Plugins](#) for more information.

### 1.18.2. Plugin AppFrame

New plugin allowing to integrate various wiki pages and modules into a custom frame divided into tabs and columns. The frame will take up as much space as possible in the screen.

See [PluginAppFrame](#).

### 1.18.3. Plugin Category Transition

New plugin that displays controls to trigger [Category transitions](#) for any object. See [PluginCategoryTransition](#)

### 1.18.4. Plugin Contribution Dashboard

New plugin that lists users contributions to your work. See [PluginContributionsDashboard](#)

### 1.18.5. Plugin Convene ("Doodle"-like)

New plugin that allows a group to indicate their preferences for the best option to convene a date for a meeting, action, etc. The interface and purpose is very similar to the basic goal that is commonly achieved by using the website "Doodle" (<http://doodle.com>).

See [PluginConvene](#)

### 1.18.6. Plugin Countdown

Many fixes and improvements to [PluginCountdown](#) have been implemented.

### 1.18.7. Plugin Exercise

New plugin. See [PluginExercise](#)

### 1.18.8. Plugin HTMLfeed

New plugin. See [PluginHTMLfeed](#)

### 1.18.9. Plugin Page Tabs

Introduced in [Tiki9](#), it allows the display of content in Tabs, where tabs = wiki pages. (ref. r39020). See [PluginPageTabs](#).

### 1.18.10. Plugin List

New parameters maxRecords and offset added, and use the preference for maximum records if this is not set in plugin parameters. See [PluginList](#).

### 1.18.11. Plugin Map

Improved plugin, which currently allows to specify layers to load via search. See [PluginMap](#).

### 1.18.12. Plugin MemberPayment

Improved plugin, which currently allows for giving of free periods on the purchase of at least 1 real full period. Moreover, the plugin shows 2 decimal places even if there is only one. See [PluginMemberPayment](#).

### 1.18.13. Plugin Now

Display the current date or time -> [PluginNow](#)

### 1.18.14. Plugin Report

New plugin, that builds a [Report](#), stores it in a wiki page, and has the ability to edit it from the wiki page itself. See [PluginReport](#).

### 1.18.15. Plugin Slideshow

It includes the option to generate a [PDF](#) from the presentation itself. See [PluginSlideshow](#)

### 1.18.16. Plugin Timesheet

This plugin allows to use the new feature [#Timesheet](#) inside a wiki page.

See [PluginTimeSheet](#)

The screenshot shows a window titled "Mini TimeSheet" with a "Full View" button. At the top, there are buttons for "New task", "Delete all", and checkboxes for "C" and "A". Below this is a list of tasks:

Date	Description	Duration	Timer Control
14.10.2011	testing timesheet from robert in trunk	0:06:48	(power icon)
14.10.2011	Email	0:58:51	(power icon)
14.10.2011	Another email box tralari-tralara through thunderbird al	0:03:59	(power icon)
14.10.2011	screenshotting timesheet for robert and marc	0:00:00	(power icon)

A tooltip "Timer on/off" is visible over the power icon for the third task. There are "Edit | Delete" links next to each task entry.

### 1.18.17. Plugin TrackerFilter

It allows filtering for the fields [Tags](#) [Tracker Field](#) and [Auto-Increment Field](#). And basic support has been added for [Item link](#) field type also.

### 1.18.18. Plugin WYSIWYG

This plugin permits to have a WYSIWYG section for part of a page. For example, you want to use [WYSIWYG](#) for a table, but keep most of the page as wiki syntax.

See [PluginWYSIWYG](#)

## Table of contents

Section 1

Section 2

Section 2b

## Section 1

The screenshot shows the Tiki Wiki editor interface. At the top is a toolbar with various icons for bold, italic, underline, superscript, and other formatting options. Below the toolbar is a larger toolbar with icons for file operations like save, delete, and move, along with other document-related functions. The main workspace contains a rich text editor with a placeholder text block. A note at the top of the workspace says "See the documentation and the dev page" with a lightbulb icon. The bottom of the editor window has "Save" and "Cancel" buttons, along with a small "New" icon.

## Section 2

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut a ligula velit, imperdiet accumsan erat. Fusce ut enim eget tellus interdum gravida. Nulla luctus dapibus ipsum nec posuere. Curabitur quis ligula eget est dignissim placerat id quis augue. Sed eu eros at massa pretium pharetra sed ut est. Donec id gravida mauris. Integer id ipsum ac nisi porta lobortis. Vestibulum scelerisque viverra ipsum sed euismod. Quisque vitae augue ultrices metus accumsan ornare. Ut suscipit lorem sit amet leo pharetra sit amet gravida urna tempor.

Aliquam arcu massa, aliquet in auctor at, tristique lobortis turpis. Suspendisse potenti. Ut dui justo, consectetur quis dignissim vel, interdum ut tortor. Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Nulla sollicitudin elit vel arcu ullamcorper vel eleifend felis pellentesque. Curabitur auctor metus vitae diam scelerisque bibendum. Maecenas sed diam leo, eu venenatis tellus. Sed ac eros nibh. Curabitur vehicula diam ac elit lacinia et mattis odio tincidunt. Maecenas varius mi sit amet odio porttitor sodales. Fusce est tellus, luctus tempus imperdiet eget, fringilla vel enim. Pellentesque imperdiet, risus in porta consectetur, quam turpis iaculis ante, at pharetra sem tellus nec risus. Integer in lacus id odio congue viverra. Suspendisse potenti. Cras scelerisque posuere massa sit amet euismod. Nunc sagittis nisl eu velit congue sed vulputate arcu blandit.

### 1.19. Profiles

Tiki9 allows to update tracker item via configuration profiles.

### 1.20. Reports

A new feature for reporting based on other tiki features has been added, deprecating the previous partial "tracker reports". See [Reports](#).

The screenshot shows the Tiki Tracker and Search interface. At the top, there's a 'Tracker' dropdown set to 'Time sheet - 34'. Below it, there are fields for 'Start' (empty), 'End' (empty), 'Item Id' (empty), and 'Status' (checkboxes for 'o', 'p', and 'c' are checked). Under 'Search', the dropdown is set to 'Summary - 254' and the search term 'for' is empty. Below this, 'Fields' are listed with checkboxes for 'Summary - 254', 'Associated project - 255', 'Description - 256', 'Amount of time spent - 257', and 'Done by - 258', all of which are checked. At the bottom, there are buttons for 'Preview', 'Save', and 'Export As CSV'. A table below shows a single row of data:

	A	B	C	D	E
1	254	255	256	257	258
2	Watch TV		Taking it easy	5	
3					

## 1.21. Search: shell script added for cron and index maintenance

Shell script for use in cron tasks for search index maintenance. See [Search and List from Unified Index](#) and [Cron](#).

### 1.21.1. Lucene Search

When using Lucene Search, now:

- the page alias is displayed if the page is in a Structure and an alias is set
- the search result snippet can be wiki parsed (pref in admin screen)
- content items in designated Categories can be excluded from search results (pref in admin screen) - this stops the items from being indexed so a Rebuild Index is needed whenever this is used/changed

## 1.22. Security

A new preference has been added (trust\_input) to allow (or disallow) the tiki\_p\_trust\_input permission in a tiki-wide sense to increase security. It defaults to n for safety. See [General Security](#)

## 1.23. SEO enhancements

You can now automatically generate a site map for SEO performance. See [Search Engine Optimization](#) for details.

## 1.24. Server Check

The "Server check" feature (tiki-check.php) was introduced in Tiki 9.2. and it checks if the server is appropriately configured for Tiki. See: [Server Check](#)

## 1.25. Smarty updated to 3.1

Smarty, the template engine used in Tiki, has been updated to its version 3.1. More information for developers (end users shouldn't notice too much difference):

[http://smarty-php.googlecode.com/svn/trunk/distribution/SMARTY\\_3.1\\_NOTES.txt](http://smarty-php.googlecode.com/svn/trunk/distribution/SMARTY_3.1_NOTES.txt)

## 1.26. Spam protection through multiple ip banning from comments and action log

Spam protection as been enhanced by means of adding the ability to send multiple ip information to the Admin Banning directly from either the [Comment moderation](#) or from the [Action log](#).

## 1.27. Structures

See [#Wiki\\_Structure\\_enhancements](#) below

## 1.28. TextBacklink Protocol

Introduced in [Tiki9](#), this feature allows to create a dynamic compendia. See [TextBacklinkProtocol](#)

## 1.29. Themes

Raspberry theme option added for FiveAlive theme. See [Themes](#)

## 1.30. Timesheet

Timesheet allows to track time spent on different tasks and projects. It uses an special [Jquery](#) plugin called JTrack, which allows to have time counters on even if the users closes the browser or logsout for some reason. It is avery useful feature for project management, in which workers are expected to record the time spent on different tasks.

The screenshot shows the Tiki Time Tracker interface. At the top, there's a navigation bar with the Tiki logo, "wiki cms groupware", "Quick Admin" links, and a "LOG OUT" button. Below the navigation is a "Menu" sidebar with links to Home, Wiki, File Galleries, Spreadsheets, Trackers, Admin, and TimeSheet. The main content area is titled "Time Tracker" and shows a list of tasks. The tasks are listed in a table-like format:

Date	Description	Duration
14.10.2011	testing timesheet from robert in trunk	0:08:48
14.10.2011	Email	1:01:35
14.10.2011	Another email box tralari-tralara through thunderbird also	0:03:59
14.10.2011	screenshotting timesheet for robert and marc	0:00:00

Each task row has "Edit | Delete" links at the bottom. There are also "C" and "A" buttons above the table header.

See [TimeSheet](#)

## 1.31. Token Access

It has been improved with an interface in the admin panels, and another interface to manage created tokens and create new ones. Moreover, tokens can have no limit in time or clicks. See [Token Access](#)

## Admin Tokens

The screenshot shows a table titled "List tokens" with one row of data. The columns are: Id, Entry, Token, Creation, Timeout, Hits, Max hits mail, Parameters, Groups, and Actions. The data in the first row is:

Id	Entry	Token	Creation	Timeout	Hits	Max hits mail	Parameters	Groups	Actions
4	/tiki-print.php	90b40406a595d77	2011-11-28 17:08:45	60	9	1	page=Configuració dels Equips	Admins, Editors, Registered, Anonymous,	

## 1.32. Trackers

### 1.32.1. Exporting items improvement

New option added to export ItemLink fields by reference instead of displayed value for cases when the purpose is to reimport later. See the new checkbox saying "**Export ItemLink type fields as the itemId of the linked item (to facilitate importing)**". For more information, see also [Item Link](#).

### 1.32.2. Files field allows replacing files instead of just adding them in file galleries

Tracker Files field has the ability to replace existing file, instead of simply adding files in the file gallery. See [Files Tracker Field](#)

### 1.32.3. Item link improvements

Some new parameters have been added to tracker field "item link", which allows selecting more than one item from Tracker B as linked with that item in Tracker A, and many other improvements.

See Tracker Field [Item Link](#).

### 1.33. TRIM

The Tiki Remote Instance Manager (TRIM) supports to backup wordpress instances. See [TRIM](#) and [WordPress importer](#).

### 1.34. Wiki Structure enhancements

#### 1.34.1. Structure management with drag & drop

Nodes from Wiki Structures can be moved around in the tree through drag and drop.

In addition, "add new page" form has been moved into a dialog and add + buttons have been added to page actions

# Modify Structure:

[Structures](#)

## Structure Layout

Top Alias:  [Update](#)

1.	Tutorials	<a href="#">Page alias...</a>	
1.	Tutorial: Registration and Login	<a href="#">Page alias...</a>	
2.	Editing Wiki Pages	<a href="#">Page alias...</a>	
1.	Lost edit	<a href="#">Page alias...</a>	
3.	Menu HOWTO	<a href="#">Page alias...</a>	
4.	Tutorial: Navigating Maps	<a href="#">Page alias...</a>	
5.	Create a profile	<a href="#">Page alias...</a>	

See [Structures](#)

### 1.34.2. Structures allows management delegation

The permission to edit structures (tiki\_p\_edit\_structures) has now object scope, which allows to delegate its management to some groups of users, without granting the same permission globally or to the other structures.

This management allows to add new pages to the structure or to move pages to different positions in the same structure.

See [Structures](#)

### 1.35. WYSIWYG enhancements

- WYSIWYG editor which saves in Wiki syntax (instead of HTML) has been improved quite a bit.

To activate: tiki-admin.php?page=wysiwyg -> Use Wiki syntax in WYSIWYG

Tiki9 add a new option, Visual Wiki.

It is available from the WYSIWYG admin panel "Use Wiki syntax in WYSIWYG" and can be set on or off.

With Visual Wiki, Wiki syntax and HTML can be used together on the same text area.

It still have some limitations as it is very new. (note: it is experimental)

Setting it on add a new toolbar set "Visual Wiki" in conjunction with previous Wiki and WYSIWYG toolbar that stay the same as previous version.

Upgrading

Upgrade from Tiki8

If you had some toolbars with custom icons, you might need to reset them, since there was a general

directory revamp of icons in Tiki, and the toolbar admin interface won't work with these "bad" tools in there, if the icon paths are wrong.

- There is a "**delete all custom tools**" option that you can launch with this url:  
**tiki-admin\_toolbars.php?reset\_all\_custom\_tools=y**
- ... and you should get a confirm message - confirm it and all the custom tools will be gone. You will have to remake them afterwards with the correct icon paths.

Hopefully there will be an upgrade script to fix this before Tiki 9, but just in case, and for early tester, this workaround should do.

### Upgrade from earlier than Tiki8 (Tiki6 LTS, ...)

Besides reading the general [Upgrade](#) notes, keep in mind also that [Tiki7](#) introduced several major changes from prior versions. If you are upgrading from an earlier version, you are encouraged to read first the pages describing the changes introduced in earlier versions of Tiki, such as:

- [Tiki8](#)
- [Tiki7](#), especially [http://doc.tiki.org/Tiki7#Upgrade\\_notes](http://doc.tiki.org/Tiki7#Upgrade_notes)
- [Tiki6](#)
- [Tiki5](#), especially [http://doc.tiki.org/Upgrade#If\\_you\\_need\\_to\\_fix\\_the\\_encoding\\_issue](http://doc.tiki.org/Upgrade#If_you_need_to_fix_the_encoding_issue)
- [Tiki4](#)
- [Tiki3](#)

If you were using trackers in your [Tiki configuration profiles](#), beware of the changes in the tracker fields. See the section [Profiles](#) in the Tiki8 page.

### Upgrade steps

Remember these steps if you are upgrading from a previous version up to 9.

1. Read the general [Upgrade](#) notes, if you haven't done so in the last few years.
2. Remember to run setup.sh again (if you have console access).
3. Beware of changes in modules and their management:  
<http://dev.tiki.org/Modules+Revamp>
4. Check these two pages for notes specific on upgrading your theme style:
  - <https://themes.tiki.org/Upgrading>
  - <https://themes.tiki.org/Theme+header+modules>

Keep in mind that your Custom site header might be gone, in which case you'll need to manually re-do it using module management.

In other cases, custom top bar code or other custom sections you had coded in **Admin Home > Look & Feel > General Layout Options** might be misplaced. If so, go to **Admin > Modules** and set the proper order of the modules (see [Theme Header Modules](#) for more information on the proper order for header modules).

5. You might need to re-approve some of your plugin calls.

Go to <http://example.org/tiki-plugins.php> as admin and approve them all (after revision, if needed, as always)

See [Upgrade](#) for more details.
