

WYSIWYG

Overview

The WYSIWYG (What You See Is What You Get) feature provides a user friendly editing alternative to the Wiki syntax editor. When using the WYSIWYG editor, information copied and pasted into a wiki page will retain most of its original formatting.

| Extra plugins                        | In Tiki, CKEditor uses the "standard" package in which some plugins are disabled by default that are available in the "full" package.<br>See <a href="http://ckeditor.com/presets">http://ckeditor.com/presets</a> for a comparison of which plugins are enabled as standard.<br>👉 <i>List of plugin names (separated by,)</i>   | bidi,colorbutton,divarea,fi... |
| Wiki paragraph formatting            | When the wiki paragraph formatting feature is on, all groups of non-blank lines are collected into paragraphs. Lines can be of any length, and will be wrapped together with the next line. Paragraphs are separated by blank lines. When the Wiki paragraph formatting feature is off, each line will be presented as you write it. This means that if you want paragraphs to be wrapped properly, a paragraph should be all together on one line.  | Enabled                        |
| Create line breaks within paragraphs | When Wiki paragraph formatting is enabled, this option creates line breaks within paragraphs.  | Enabled                        |

| Option         | Description  | Default |
|----------------|--|---------|
| Ajax           | Allows for efficient retrieval and display of information from the server, thus improving the user experience. This feature is required for the interface for many features to work.<br><b>▲</b> <i>This feature is required for the interface for many features to work properly.</i> | Enabled |
| Ajax auto-save | Save content during editing, enabling work to be recovered after any interruption. Also enable a real-time preview. This option is required for WYSIWYG plugin processing.   | Enabled |

The jQuery Sortable Tables feature must be activated for the sort feature to work.
