

# Articles Config

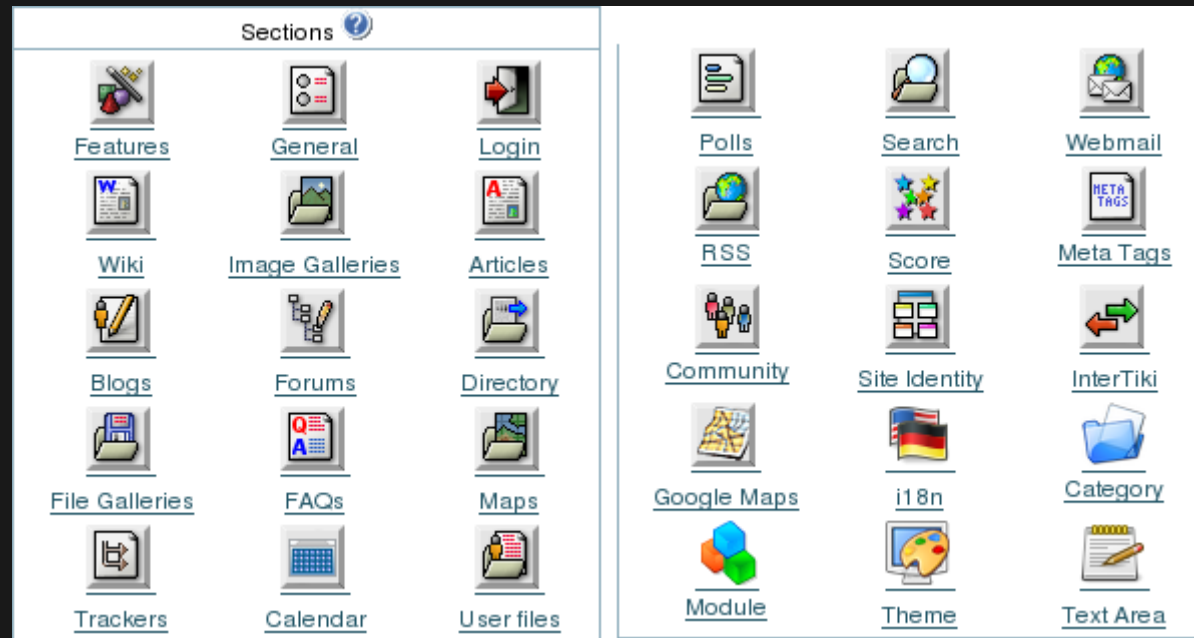

## ADMIN ACCESS

To access administration, go to **Home Page** and, on the **Menu**, click on "**Admin (click!)**".

## SECTIONS: TIKI ADMIN PANEL

You will access the **Sections** Tiki Admin Panel (see [Admin Panels](#) ), as shown in this graphics:

# ARTICLE/CMS SETTINGS

From the Tiki Admin Panel, click the Articles icon to display the Articles setup panel, the top of which appears like so:

The screenshot shows a web interface titled 'CMS settings' with a light blue header. It is divided into three main sections. The first section, 'CMS features', lists 'Rankings:' (checked), 'Comments:' (unchecked), 'Spellchecking:' (unchecked), and 'Use templates:' (unchecked), with a 'Set features' button below. The second section, 'Maximum number of articles in home:', has a text input field containing '10' and a 'Change preferences' button. The third section, 'Article comments settings', has 'Default number of comments per page:' (input '10') and 'Comments default ordering' (dropdown 'Points'), with a 'Change preferences' button. The final section, 'Articles listing configuration [view](#)', lists 'Title', 'Topic', 'Date', 'Author', 'Reads', 'Size', and 'Img', all with checked checkboxes, and a 'Change preferences' button at the bottom.

You can select here if the rankings and comments features are enabled for articles and submissions. You can also select the maximum number of articles to display in the articles home page.
