

Customization tab

Overview

Use this tab to add custom CSS styles to your site.

To Access

From the [Look and Feel Admin](#) page, click the **Pagination Links** tab.

Related Topics

- [Tiki Themes](#)
- [Theme Generator](#)

Option

Custom CSS

Description

Additional CSS rules can be entered here and will apply to all pages, or the CSS ID of a page can be used to limit the scope of the rule (check the HTML source of the particular page to find its body ID tag.)

Default

None

Option

Custom HTML head content

Custom code just before the closing
</body> tag

Description

Additional content such as meta or link tags can be added to the head section of HTML files. Smarty filters can be used here.

 Example: `{if $page eq 'Slideshow'} {literal}yle
type="text/css">.slideshow { height: 232px;
width: 232px; } {/literal} {/if}`

Enter lines here to be placed near the end of the HTML file.

Default

None

None

Option

Google Analytics account number

Custom JavaScript

Description

The account number for the site. The account number from Google is something like UA-XXXXXXXX-YY or G-XXXXXXXXXX.

 *Enter the account number with prefix (prefix eg: "G-" or "UA-")*

Includes a block of inline JavaScript after the inclusion of jQuery and other JavaScript libs in all pages.

 *Use [PluginJS](#) to include Javascript on a single wiki page.*

 *Do not include the `< script >` tags.*

Default

None

None

Option

Add group CSS info

Categories to add as CSS classes to
<body>

Theme Customizer tool

Description

Either grp_Anonymous or grp_Registered and possibly grp_Admins as well

 *Add CSS classes to the page BODY tag based on the user's group membership*

Pages in selected categories will have a class with syntax like "cat_catname" added to the body tag.

Activate the theme customizer tool to enable easy theme customization.
