The screenshot shows the Joomla! administration interface for the Security tab. At the top, there are navigation tabs: General Security (selected), Spam protection, Search results, Site Access, Tokens, and Clipperz online password management. Below the tabs, there are several security options:

- Smarty Security (with a warning icon)
- HTML Purifier (with a help icon). Below it, a note reads: "If you are trying to use HTML in your pages and it gets stripped out, you should make sure your HTML is valid or de-activate this feature."
- Output should be HTML Purified (with a help icon and a warning icon)
- REALLY allow HTML (INSECURE) (with a help icon). Below it, a red error message states: "You need to set Allow HTML in menu option names and URLs"
- Protect all sessions (with a help icon)

Below these options, there is a section for CSRF Security with the instruction: "Use these options to protect against cross-site request forgeries (CSRF)."

- Require confirmation if possible CSRF detected (with a help icon)
- Protect against CSRF with a ticket (with a help icon)

An "Apply" button is located at the bottom of the form.
