

Google Map Details

There are some improvements made to Tiki to take advantage of [Google Maps](#).

Geolocation of Tracker items

(for Tiki version 1.10)

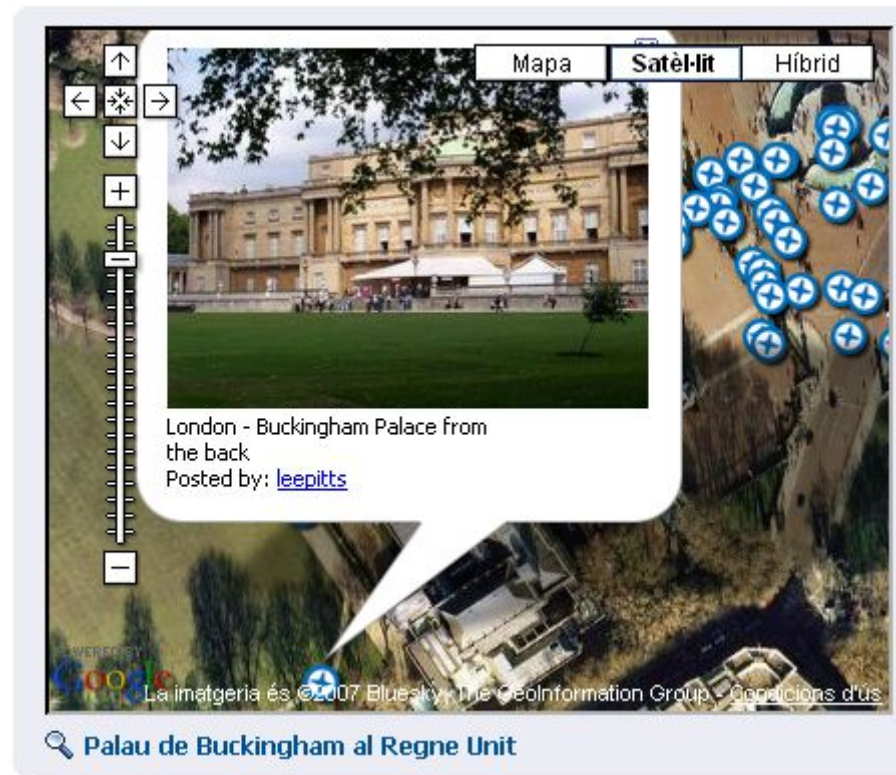

Items in a tracker can be geolocated:

Panoramio

Other similar features (which also Google Maps) could be introduced in your Tiki installation.

For instance, Panoramio, a photo-sharing community using Google Maps ("*Discover the world through satellite photos*" - <http://www.panoramio.com>).

This kind of simple feature could be included through creating and using those two files in your tiki installation:

tiki-panoramio.php
