

Module directory_last_sites

This module allows you to display directories

Parameters

Displays the specified number of the directory sites most recently added.

[Go to the source code](#)

Preferences required: feature_directory

Parameters	Accepted Values	Description	Default	Since
absurl		If set to "y", some of the links use an absolute URL instead of a relative one. This can avoid broken links if the module is to be sent in a newsletter, for example. Default: "n".		
more		If set to "y", displays a button labelled "More" that links to the directory. Not set by default.		
categoryId		If set to a directory category identifier, only displays the sites in the specified directory category. Not set by default.		
maxdesc	int	If desc = "y", use maxdesc to set the maximum length of the directory site (in characters). Leave blank to set no maximum (show the entire description). Default: blank.		
desc	word	If set to "y", the description of the directory site appears. Default: "n".		

This is a stub. Some screenshot is needed
