Module last_modif_pages

This module displays the most recently edited wiki pages, in reverse chronological order, and provides a link to each page.

PARAMETERS

List the specified number of pages, starting from the most recently modified.

Go to the source code
Preferences required: feature_wiki

Parameters	Accepted Values
`absurl`	
`action`	

Description

If set to "y", some of the links use an absolute URL instead of a relative one. This can avoid broken links if the module is to be sent in a newsletter, for example. Default: "n".

If set to "y", show action performed on the pages. (y / n)

Default   Since

comment

date

url

user

maxlen   int

maxcomment   int

If set to "y", show the descriptions of the change made on the pages. (y / n)

If set to "y", show page edit dates. (y / n)

Target URL of the "...more" link at the bottom of the module. Default: tiki-lastchanges.php

If set to "y", show who edited the pages. (y / n)

Maximum number of characters in page names allowed before truncating.

Maximum number of characters in comments allowed before truncating.

days   int

show_namespace

Number of day in past to look for modified pages. Defaults to "356"

Show namespace prefix in page names. (y / n)

y

USAGE

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin_modules.php**).

You can assign a this Module to a lateral column (See Module Admin page if needed), or you can include it within a wiki page, using the PluginModule.

{MODULE(module=>last_modif_pages) /}

See PluginModule for additional parameters that can be used.

The assigned module looks like this:

1. Installation

...more
