Module Logo — the site logo module

This module displays the site logo, site title and site subtitle, or any combination of these. The information for the logo module can be managed on the Admin Modules page (tiki-admin_modules.php) or the Look & Feel admin page (tiki-admin.php?page-look). To use alternative logo modules, containing more or less content depending on screen size, configure the modules on the Admin Modules page rather than entering information on the Look & Feel admin page.

PARAMETERS

Site logo, title and subtitle.

Go to the source code

Preferences required: feature_sitelogo

Parameters	Accepted Values
alt_attr	text
title_attr	text
