

# Module TrackerHelp

Introduced in Tiki6.

This module allows you to display the `fieldIds` of a tracker. Useful when adding TRACKER plugins.

## Parameters

Display the fields of a tracker (name and identifier)

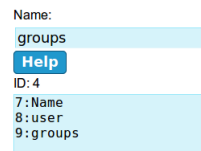

[Go to the source code](#)

*Preferences required:* `feature_trackers`

Parameters	Accepted Values	Description	Default	Since
<code>height</code>	int	Number of lines		
<code>cols</code>	int	Number of characters		

Example:

**Tracker Help**

Since Tiki7

A button allows to copy in a Pretty Tracker format all the fields in the current textarea of an edited wiki page.
