

# Plugin Aliases tab

## Overview

Use this tab to create a new wiki plugin, by using a modified copy of an existing plugin.

## To Access

From the Text Area Admin page, click the **Plugin Aliases** tab.

## Note

*if applicable*

The screenshot shows the 'Text area' admin interface with the 'Plugin Aliases' tab selected. The page title is 'Text area' and the breadcrumb trail is 'General Settings > Plugins > Plugin Aliases'. The main content area is titled 'About plugin aliases' and contains the following configuration sections:

- General Information:** Fields for Plugin Name, Base Plugin (set to 'addtocart'), Name, Description, Body Label, Dependencies, Filter (set to 'xss'), Validation (set to 'none'), and an 'Inline (No Plugin Edit UI)' checkbox.
- Simple Plugin Arguments:** A table with columns for 'New Argument' and 'Default'.
- Plugin Parameter Documentation:** A section for documentation.
- Plugin Body:** An 'Ignore User Input' checkbox and a large text area for 'Default Content'.
- Parameters:** A section for defining parameters.
- Composed Plugin Arguments:** A section for composed arguments.

A 'Change preferences' button is located at the bottom right of the form.
