## EXAMPLE WITH DATETIME, MAX AND MAXDAYS PARAMETERS SET

Below is an example using the 2 calendars at <http://dev.tiki.org/tiki-calendar.php>. There are two calendars (ID's 1 and 2) and the code below accesses both of them.

*This code:*

---

```
{EVENTS(calendarid="1|2" datetime="1" max="8" maxdays="15")} {EVENTS}
```

Note

Although the max is set at eight, only four events are displayed. This is because there were only four events within 15 days (the maxdays setting) of the date the screenshot was made.
