

# Plugin Fade

Use this wiki plugin, introduced with Tiki3, to create a link that shows/hides initially hidden content using a fade-in/fade-out effect. In Tiki16 a new parameter bootstrap ('y' or 'n') was added, to generate bootstrap collapsible box instead of the previous html code.

## Parameters

Create a link that shows/hides initially hidden content  
*Introduced in Tiki 3. Required parameters are in **bold**.*
