# Plugin Invite

*Introduced in Tiki4*

Use this wiki plugin to invite an already existing user or a new user to one or more of the requesting user's groups.

The groups will be limited to the groups the user is in. A user with his email as his login will be created if the user does not exist. Otherwise if a user with this email will be used. An email will be sent to this user with a link to activate his account for a new user (activation like the email 'refresher') - A simple email will be sent if the user already exists.

## PREREQUISITES AND LIMITATIONS

The user must have the perm `tiki_p_invite` to use this plugin.

In intertiki, the user is locally created.

## PARAMETERS

Invite a user to join your groups
*Introduced in Tiki 4.*
Go to the source code
*Preferences required:* wikiplugin_invite, feature_invite

| Parameters | Accepted Values |
| --- | --- |

(body of plugin)
