

# Plugin Mono

Use this wiki plugin to display text in a monospace font. By default, the monospace font specified by the browser is displayed, but another monospace font recognized by the browser may be used as well.

# Parameters

Display text in a monospace font

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_mono`

| Parameters        | Accepted Values | Description                           | Default   | Since |
|-------------------|-----------------|---------------------------------------|-----------|-------|
| (body of plugin)  |                 | Text that the font will be applied to |           |       |
| <code>font</code> | text            | Font name as recognized by browsers.  | monospace | 1     |

# Examples

# No Font Parameter

*This code,*

---

```
{MONO()}This is the browser's default monospace font.{MONO}
```

*Would produce:*

```
This is the browser's default monospace font.
```

# With Font Parameter Set

*This code,*

```
{MONO(font="Lucida Console")}This is the monospace font called Lucida Console.{MONO}
```

*Would produce this:*

This is the monospace font called Lucida Console.
