

Plugin PrefDoc

This [wiki plugin](#) generates and displays preference documentation for use on doc.tiki.org website.

- This will automatically record and keep past preference versions.
- It automatically re-caches the current tiki preferences every time the version number increases (like from 17.0 to 17.1)
- You may force a re-cache by emptying all caches (will only re-load current version)
- If description, hint or help (link) are added to a new version of tiki, it populates past versions that are missing that information
- Images specified for past version of tiki be used for up to 5 newer versions if no other images exist
- Preference data is stored as it is in tiki to allow for maximum expansion in the future with backwards compatibility (like if color coding for basic-advanced-experimental was to be implemented etc.)
- Plugin visual appearance is independent from storage, allowing for dramatic future style changes.
- If an invalid, or non-existent tab-name is given, a list of available options will be presented.

PARAMETERS

Generate documentation for Tiki preference tabs, mostly for use on the Tiki documentation website (doc.tiki.org).

Introduced in Tiki 17.

[Go to the source code](#)

Preferences required: wikipugin_prefdoc

Parameters	Accepted Values
------------	-----------------

<code>img</code>	text
------------------	------

<code>tab</code>	text
------------------	------

<code>section</code>	text
----------------------	------

Description

Show images at the top of each version of Tiki. Format: TikiVersion:FileGalleryID. Multiple images may be separated like so:

TikiVersion1:FileGalleryID1|TikiVersion2:FileGalleryID2.

The name of the preference tab to display, or a list of available tabs upon invalid.

Show just a section of preferences of the tab. Specify the name of the section to show.

Default	Since
---------	-------

	17
--	----

	17
--	----

	26
--	----

EXAMPLE

GENERATE LIST OF AVAILABLE PREFERENCES TO DISPLAY

This code:

```
{PREFDOC()/}
```

DISPLAY LOOK AND FEEL: GENERAL LAYOUT, WITH IMAGES

There are 2 images specified. Tiki 17 image has a file gallery id of 33 and the Tiki 14 image has a file gallery id of 12.

This code:

```
{PREFDOC(tab="look-layout" img="17:33|14:12")/}
```

Option

Fixed width

Layout width

Site layout

Description

Restrict the width of the site content area, in contrast to a liquid (full-width) layout.

The width of the site's content area (Bootstrap container div), centered in the browser window.

 *The default is 1170px.*

Changes the template for the overall site layout

 *Important: when using the Classic Bootstrap (fixed top navbar) layout, be sure to set the fixed-top navbar height, below, to prevent content overlap.*

 Single Container | Classic Tiki (3 containers - header, middle, footer) | Classic Bootstrap (fixed top navbar)

Default

Enabled

1170px

Classic Bootstrap (fixed to...

Option

Enable layout per page, etc.

Fixed-top navbar height

Header bar and Address bar color

Description

Specify an alternate layout for a particular wiki page, etc.

For the Classic Bootstrap or equivalent layout, specify the height of the navbar in fixed position at the top of the page. The logo module image assigned to the top module zone will scale to display correctly here.

 *Clear the Tiki system cache for this change to take effect.*

Change the color of header bar and address bar according to the theme.

Default

Disabled

90 px

Disabled

Option

Default color mode

Admin layout

Site logo and title

Logo source (image path)

Description

Change the default color mode for active theme

☰ auto | dark | light

Specify which layout template to use for admin pages.

☰ Single Container | Classic Tiki (3 containers - header, middle, footer) | Classic Bootstrap (fixed top navbar)

Display a site logo image and/or title in the page header area.

 *This setting is expected to be moved from here to the admin-modules page.*

This can be a conventional path to the image file, or the syntax for an image in a Tiki gallery.

Default

Auto

Single Container

Enabled

img/tiki/Tiki_WCG.png

Option

Logo title (on mouseover)

HTML "alt" tag description

Site logo upload icon

Site title

Subtitle

Description

This appears as tool tip text. The site logo is also a link to the site index (top page).

Normally a description of the image, such as "Example.com logo"

 *Used by text browsers, screen readers, etc.*

Display an icon for admins to be able to change or upload the site logo.

The displayed title of the website.

A short phrase that, for example, describes the site.

Default

Tiki-powered site

Site Logo
