

Plugin RSS

Use this wiki plugin to display items received from an external RSS feed that has been set up in the external feed feature (at `tiki-admin_rssmodules.php`). See External Feeds on how to set up Tiki to receive external feeds, which will need to be done first before using this plugin. For outgoing RSS feeds, see Feeds.

Parameters

Display items from one or more RSS feeds

Introduced in Tiki 1.

[Go to the source code](#)

Preferences required: `wikiplugin_rss`

Parameters	Accepted Values	Description	Default	Since
<code>descLen</code>	digits	Max characters/length, truncates text to fit design	0	10.1
<code>favicon</code>	url	URL to a favicon to put before each entry		5.0
<code>max</code>	int	Number of results displayed.	10	1
<code>tplWiki</code>	text	Custom wiki page with smarty content to use for displaying feed items instead of the default template		28.0
<code>author</code>	(blank) 1 0	Show authors (not shown by default)	0	1
<code>date</code>	(blank) 1 0	Show date of each item (not shown by default)	0	1
<code>desc</code>	(blank) 1 0	Show feed descriptions (not shown by default)	0	1
<code>refresh</code>	digits	Refresh period in minutes, determining how frequently the RSS feed is updated.	60	29.0
<code>showtitle</code>	(blank) 1 0	Show the title of the feed (shown by default)	1	6.0
<code>ticker</code>	(blank) 1 0	Turn static feed display into ticker news like	1	10.1
<code>url</code>	url	The full URL of the RSS feed. Use this parameter if you want to directly link to an RSS feed without adding it to the RSS Administration page.		29.0

id	int	List of feed IDs separated by colons (e.g., feedId:feedId2). You can find the IDs in the RSS	1
	separator: :	Administration page: tiki-admin_rssmodules.php.	
sortBy	title	Sort by field	publication_date 28.0
	publication_date		
	author		
sortOrder	ASC	Sort order	DESC 28.0
	DESC		

Usage notes

- feedId is the id of the feed set up at *Settings > External Feeds* (or tiki-admin_rssmodules.php), max is the number of shown entries, date and author (optional) are added if set to 1 , and hidden if set to 0 , desc is a short description of the current rss item (optional).

You can also combine feeds by indicating 1:2 , or 1:2:3 to add feeds together. Note, however, that if you are combining feeds, "show publish date" must be checked in the Feeds module settings, in order to allow this plugin to sort the combined feeds.

Examples

Let's say you wish to display the list of last 3 items of a feed with the Id of 1 inside a Wiki page. Simply include this in your page, with date, but no author:

```
{rss id="1" max="3" date="1" author="0" desc="1"}
```

New Security Update Released for Tiki 21.x LTS and Upgrade is Strongly Recommended

📅 Mon 07 Apr, 2025

A Security update is now available for Tiki 21.x LTS (Long-Term Support). Users of this version are strongly recommended to update their websites. Please get the latest version file here: Tiki 21.12. Note that Tiki 21.x entered end of life end of March 2025 and this is the last release for Tiki 21.x LTS. We encourage upgrade to Tiki 24.8 or Tiki 27.2 or Tiki 28.3 instead of Tiki 21.12. We extend our sincere gratitude to Egidio (aka EgidX) for identifying and reporting these vulnerabilities, as well as for his valuable collaboration in resolving them. If there is any question, please post it in the forums here or in the Tiki chat or on a Tiki mailing list. Support beyond what the Tiki community can provide through these channels is also available from EvoluData (<https://evoludata.com/Tiki-Extended-Security-Maintenance>), including support for any version, including outdated versions.

New Security Updates Released for Tiki 28.x, 27.x LTS and 24.x LTS and Upgrade is Strongly Recommended

📅 Thu 27 Mar, 2025

New security updates are available for the following Tiki versions: 28.x, 27.x LTS (Long-Term Support) and 24.x LTS. Users of these versions are strongly encouraged to update their websites as soon as possible to ensure security of their websites. Please download the latest versions here: Tiki 28.3, Tiki 27.2 and Tiki 24.8. We extend our sincere gratitude to Egidio (aka EgidX) for identifying and reporting these vulnerabilities, as well as for his valuable

collaboration in resolving them. If there is any question, please post it in the forums here or in the Tiki chat or on a Tiki mailing list. Support beyond what the Tiki community can provide through these channels is also available from EvoluData (<https://evoludata.com/Tiki-Extended-Security-Maintenance>), including support for any version, including outdated versions.

Tiki 28 Is Released - Another Version Packed with Improvements and Bug Fixes

📅 Sat 25 Jan, 2025

We are happy to announce the release of Tiki 28, the latest version of Tiki Wiki CMS Groupware! This new version brings a long list of new feature enhancements, incremental improvements, and bug fixes designed to elevate your Tiki experience. Major Enhancements IoT support: Tiki now supports IoT integration with enhanced tools for managing and designing workflows. RecordRTC: Enhanced flexibility for recording storage address use cases and improves integration with trackers and file galleries. RecordRTC is now bundled with Tiki, so fetching it as an external dependency is no longer necessary. Element Plus: Element Plus has been chosen for multi-select boxes in Tiki, replacing the jQuery Select2 library. Toolbar Enhancements: 1) Improved ability to select foreground colors with Shoelace Color Picker, 2) New button added to launch the list of all wiki plugins, 3) New toolbar element added to facilitate creating a link to a file in a comment or tracker item. Admin pages organization: The Unified Admin Backend appearance and navigation is now applied to admin and management pages that were not previously covered for a smoother admin experience.

Now you want the same using a "Ticker like" effect:

```
{rss id="1"max="3" date="1" author="0" desc="1" ticker="1" desclen="50"}
```

Smarty Feeds Function

You can also include a feed in a wiki page by using the Feeds Smarty function (`lib\smarty_tiki\function.rss.php`). Its usage is:

```
{rss id="5" max="10"}
```

Parameters for Smarty Function

d	ID	mandatory	ID of the rss
max	number	optional	max number of objects to show
skip	numbers separated by comma	optional	the objects to skip. Ex: 1,3 will skip the first object and the third one
