

Plugin ShareThis

Introduced in Tiki3

Use this wiki plugin to place a ShareThis button (from www.sharethis.com) on the page. Users can click on the button and select from a number of social networking services to share the page with their network. A ShareThis account is not necessary.

Parameters

Add a ShareThis button

Introduced in Tiki 3.

Go to the source code

Preferences required: `wikiplugin_sharethis`

Parameters	Accepted Values	Description	Default	Since
<code>buttontext</code>	text	Custom link text for the button.		3.2
<code>headertitle</code>	text	Optional header title text for the widget.		3.2
<code>style</code>	(blank) horizontal vertical rotate	Set button style.		5.0
<code>headerbg</code>	text	HTML color code (not color name) for the background color for the header if an optional header title is used.		3.0
<code>headertxtcolor</code>	text	HTML color code (not color name) for the header text if an optional header title is used.		3.2
<code>linkfg</code>	text	HTML color code (not color name) for the link text for all send and post services shown in the widget		3.0

i Other Usage Tips

- A ShareThis account is not necessary for this plugin to work properly.
- Personalized information from the user's ShareThis profile will appear in the widget if the user is signed into ShareThis, either through their website or through the widget.
- If the plugin is used more than once on a page, all instances will be the same as the first one on the page.
- May not work within a `{DIV}` or `{SPLIT}` plugin (this is an issue for any plugin that produces Javascript).

Example

This code:

```
{sharethis rotateimage="y" embed="true" buttontext="ShareThat" headertitle="Share this page!"
```

```
headerbg="333333" headertextcolor="e6d46e"}
```

Would produce this:
