Plugin Versions

Use this Wiki Plugin to divide a wiki page into separate "versions." Tiki will display a navigation box that allows users to display each version of the page. For example, you can use this plugin to separate a single wiki page into Release 1, Release 2, and Release 3 information.

Parameters

Create tabs for showing alternate versions of content

Introduced in Tiki 1.

Go to the source code

Preferences required: wikiplugin_versions

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Block of text separated by ~~(version x)~~ markers. Text before the first marker is used by default.		
`default`		Specifies version label to show when displaying the page for the first time. Default label is 'Default'	Default	1
`nav`	(blank) y n	Display a navigation box that allows users to select a specific version to display.	n	1
`title`	(blank) y n	Display the current version name as the title. No title shows when `nav="y"`; otherwise shows by default.	y	1

Notes

- If you use Wiki Config wiki page caching, this plugin may not render properly.
- The "versions" used for this plugin are different than the "versions" stored in the wiki page history.

Examples

o separate different versions of text use: 3 dashes (hyphens), followed by the version label in parenthesis, followed b
at least 3 other dashes or hyphens. For example:

---(version 3)----------------------------

Basic example

This code:

{VERSIONS(nav="y" title="y")}
This is the default text
---(version 3)-----------------------------
This is version 3 info
---(version 2)-----------------------------
This is version 2 info
---(version 1)-----------------------------
This is version 1 info
{VERSIONS}

Would produce:

This is the default text

More Examples

{VERSIONS(nav="n")} This is the default text ---(version 3)--------------------------- This is version 3 info ---(version 2)--

----------------------- This is version 2 info ---(version 1)--------------------------- This is version 1 info {VERSIONS}

Would produce:

Default

This is the default text

Sample usage in conjunction with PluginTracker and PluginTrackerList (these are Screenshots):

Default text: Formulari, using PluginTracker

Alternate version: Mostra les pre-inscripcions ja realitzades, , using PluginTrackerList

Alias

- PluginVersion
