# Features - Global features

Option	Description	Default
Wiki	Pages and collaboratively authored documents with edit history.	Enabled
File gallery	Storage of files of various formats to display or download, etc. With check-in and check-out (lock) capability	Enabled
Blog	Online diaries or journals.	Disabled
Articles	Articles can be used for date-specific news and announcements. You can configure articles to automatically publish and expire at specific times or to require that submissions be approved before becoming "live."	Disabled
Forums	Threaded or flat discussions.	Disabled
Trackers	Database and form generator	Enabled
Calendar	Events calendar with public, private and group channels.	Disabled
Unified search index	Enables searching for content at the site using a Tiki-managed index. It's recommended to set a cron job to periodically rebuild the search index.	Enabled
Category	Site-wide content category system. Items of different types (wiki pages, articles, tracker items, etc.) can be categorized. Categories can have permissions to control content access	Enabled
Tags	Enables tags to be set on pages and other items for freeform categorization.	Disabled
Polls	Presentation of a set of votable options, typically displayed in a module	Disabled
Quizzes	Sets of questions that can be presented, with the sessions timed and the scores recorded. 🚫	Disabled
Surveys	Create questionnaires with multiple-choice or open-ended questions	Disabled
Newsletters	Content mailed to registered users or other subscribers.	Disabled
Shoutbox	Quick comment (graffiti) box. Like a group chat, but not in real time.	Disabled
Minichat	Real-time group text chatting enabled through a module.	Disabled
Live support system	One-on-one chatting with customer 🚫	Disabled
Machine learning	Define machine learning models, train them and run queries against them.	Disabled

Option	Description	Default
Tiki manager	Use local Tiki Manager to install, upgrade, clone and manage local or remote Tikies.	Disabled
Storage path	The path where Tiki Manager will store internal data, backups, logs. It is recommended to be outside document root.  <i>Default: storage/tiki-manager</i>	None
Stats	Record basic statistics about major Tiki features (number of wiki pages, size of file galleries, etc.)	Disabled
Action log	Provides the ability to track the actions of users and produce reports on a per-user or per-category basis.	Enabled
Scheduler	Provides the ability to run tasks at a scheduled time.	Enabled
Banners	Insert, track, and manage advertising banners.	Disabled
Contribution	Enables users to specify the type of contribution they are making while editing items at the site. The contributions are then displayed color-coded in history and other reports.	Disabled
Copyright	Use the Copyright Management System (or Â©MS) to display the license of your content	Disabled
Communications (send/receive objects)	Send/receive wiki pages and articles between Tiki-powered sites 	Disabled
Dynamic content system	Block of content which can be reused and programmed (timed)	Disabled
Perspectives	Permits overriding of preferences.	Disabled
Search engine friendly URL	If the site is using Apache, you can rename _htaccess as .htaccess to use short URLs. On IIS, rename web_config as web.config	Disabled
HTML pages	Static and dynamic HTML content  <i>HTML can be used in wiki pages. This is a separate feature.</i> 	Disabled
Areas	Binding categories and perspectives to each other 	Disabled
Tiki suggestions	Tiki suggestions displayed once per login session based on a list of rules	Disabled
Templated Groups	Templated Groups enables Organic Groups, although strictly speaking not all Templated Groups are Organic in the sense of being created by users since they can be completely admin managed.	Disabled
Mautic Integration	Enable the feature here but configure it elsewhere	Disabled
User watches	Receive email notification of changes. Each user can choose to be notified of changes to specific items	Disabled
Group watches	All users in a group selected by a users admin (tiki_p_admin_users) will receive email notification of changes to specific items. Users cannot choose to stop receiving those notifications while they are members of that group	Disabled
Daily reports for user watches	Allows you to schedule daily reports of watches to be sent (batched) at specific times.	Disabled
Enable daily reports for new users	Determines if daily reports will be automatically enabled for new users.	Disabled

Option	Description	Default
User watches translations		Disabled
User watches languages	Watch language-specific changes within a category.	Disabled
Group alert	With this feature you can choose the user in the group to be alerted about some changes in the Tiki site: Calendar items, Tracker changes, Tracker item changes, File gallery changes 🖌️	Disabled
Object maintainers and freshness	Enable tiki objects to have maintainers, update frequency and freshness. Then, console.php objects:notify-maintainers can be used.	Disabled
Default update frequency	Default number of days for object update frequency.	90 days
Spreadsheet	Spreadsheets with calculations and charts	Disabled
Directory	User-submitted Web links	Disabled
Draw (SVG edit)	Draw enables creating and editing SVG images in all wiki text areas	Disabled
Draw (SVG edit) hide buttons	Hide buttons in Draw, HTML id, comma-separated. 👉 <i>Example: "tool_select, tool_fhpath, tools_line_show, tools_rect_show, tools_ellipse_show, tool_path, tools_shapelib_show, tool_text, tool_image, tool_zoom, tool_eyedropper"</i> 🚫	None
Separate base image	Leaves the initially edited image as a separate file and stores the drawing separately 🚫	Disabled
Draw in user file gallery	Users' drawings are stored in their user files gallery 🚫	Disabled
Tiki user credits		Disabled
Accounting	Double-entry accounting system 🚫	Disabled
Payment	Feature for tracking and managing payment requests	Disabled
Social networks	Integration with social applications and networks like Twitter and Facebook	Disabled
Share	Add a "Share" link in all pages to send it via email, Twitter, Facebook, message or forums ⚠️ <i>Be careful when allowing anonymous users to activate the antibot feature.</i>	Disabled
Webmail	Provides a webmail interface for site users' own IMAP or POP accounts. 🚫	Disabled
Mail-in	Create and publish wiki pages and articles via email	Disabled
Docs (WebODF)	Docs enables viewing and editing Open Document Format files 🚫	Disabled
Slideshow (reveal.js)	Create simple presentations via Wiki Syntax.	Disabled
Slideshow (reveal.js) PDF export	Wiki page based slideshow to pdf export 🚫	Disabled
FAQs	Frequently asked questions and answers ⚠️ <i>There has been discussion about this feature being retired, so keep in mind that normal wiki pages can be used to create and display FAQs.</i> 🚫	Disabled

Option	Description	Default
Progressive Web Application Mode	Allow Tiki to be used offline and be installed in a mobile device. ⚠️ <i>Experimental feature.</i> <i>Only Wiki pages and Trackers are available offline for now.</i> 🛑	Disabled
Links to cache in PWA Mode	List of links to be cached when PWA is enabled ⚠️ <i>Experimental feature.</i>	None
Tiki connect	Connect your Tiki with the community by sending anonymised statistical data to tiki.org ⚠️ <i>This feature is still under development.</i> 🛑	Disabled
Kaltura video management	Integration with the Kaltura video management platform	Disabled
Zotero bibliography	Connect Tiki to the Zotero online bibliography management system. 👉 <i>You must supply the following items: Zotero Client Key, Zotero Client Secret, Zotero Group, and Zotero Reference Style.</i>	Disabled
Zotero client key	Required identification key. Registration required.	None
Zotero client secret	Required identification key. Registration required.	None
Zotero group ID	Numeric ID of the group, can be found in the URL.	None
Zotero reference style	Use an alternate Zotero reference style when formatting the references. The reference formats must be installed on the Zotero server.	None
Enable Web Monetization	Enable Web Monetization showing a message in page header. 🛑	Disabled
Default payment pointer	Payment pointer to stream the payments. 🛑	None
Enable for all pages	Enable Web Monetization in all website pages. 🛑	Disabled
Always use default site pointer	Always use default Web Monetization site pointer, even when users add their username. 🛑	Disabled
Default paywall text	Default text to be used in web monetized content paywall. 🛑	None

Polls	Presentation of a set of votable options, typically displayed in a module	Disabled
Quizzes	Sets of questions that can be presented, with the sessions timed and the scores recorded. 🚫	Disabled
Surveys	Create questionnaires with multiple-choice or open-ended questions	Disabled
Newsletters	Content mailed to registered users or other subscribers.	Disabled
Shoutbox	Quick comment (graffiti) box. Like a group chat, but not in real time.	Disabled
Minichat	Real-time group text chatting enabled through a module.	Disabled

Option	Description	Default
Live support system	One-on-one chatting with customer 🛠️	Disabled
Stats	Record basic statistics about major Tiki features (number of wiki pages, size of file galleries, etc.)	Disabled
Action log	Provides the ability to track the actions of users and produce reports on a per-user or per-category basis.	Enabled
Scheduler	Provides the ability to run tasks at a scheduled time.	Enabled
Banners	Insert, track, and manage advertising banners.	Disabled
Contribution	Enables users to specify the type of contribution they are making while editing items at the site. The contributions are then displayed color-coded in history and other reports.	Disabled
Copyright	Use the Copyright Management System (or Â©MS) to display the license of your content	Disabled
Communications (send/receive objects)	Send/receive wiki pages and articles between Tiki-powered sites	Disabled
Dynamic content system	Block of content which can be reused and programmed (timed)	Disabled
Perspectives	Permits overriding of preferences.	Disabled
Search engine friendly URL	If the site is using Apache, you can rename _htaccess as .htaccess to use short URLs. On IIS, rename web_config as web.config	Disabled
HTML pages	Static and dynamic HTML content ⚠️ <i>HTML can be used in wiki pages. This is a separate feature.</i> 🛠️	Disabled
HTML feed	A way to transfer HTML content from one Tiki site to another 🗑️	Disabled
Areas	Binding categories and perspectives to each other 🛠️	Disabled
Templated Groups	Templated Groups enables Organic Groups, although strictly speaking not all Templated Groups are Organic in the sense of being created by users since they can be completely admin managed.	Disabled
User watches	Receive email notification of changes. Each user can choose to be notified of changes to specific items	Disabled
Group watches	All users in a group selected by a users admin (tiki_p_admin_users) will receive email notification of changes to specific items. Users cannot choose to stop receiving those notifications while they are members of that group	Disabled
Daily reports for user watches	Allows you to schedule daily reports of watches to be sent (batched) at specific times.	Disabled
Enable daily reports for new users	Determines if daily reports will be automatically enabled for new users.	Disabled
User watches translations		Disabled
User watches languages	Watch language-specific changes within a category.	Disabled
Group alert	With this feature you can choose the user in the group to be alerted about some changes in the Tiki site: Calendar items, Tracker changes, Tracker item changes, File gallery changes	Disabled

Option	Description	Default
Object maintainers and freshness	Enable tiki objects to have maintainers, update frequency and freshness. Then, console.php objects:notify-maintainers can be used.	Disabled
Default update frequency	Default number of days for object update frequency.	90 days
Spreadsheet	Spreadsheets with calculations and charts	Disabled
Directory	User-submitted Web links	Disabled
Draw (SVG edit)	Draw enables creating and editing SVG images in all wiki text areas	Disabled
Draw (SVG edit) hide buttons	Hide buttons in Draw, HTML id, comma-separated.  <i>Example: "tool_select, tool_fhpath, tools_line_show, tools_rect_show, tools_ellipse_show, tool_path, tools_shapelib_show, tool_text, tool_image, tool_zoom, tool_eyedropper"</i> 	None
Separate base image	Leaves the initially edited image as a separate file and stores the drawing separately 	Disabled
Draw in user file gallery	Users' drawings are stored in their user files gallery 	Disabled
Tiki user credits		Disabled
Accounting	Double-entry accounting system 	Disabled
Payment	Feature for tracking and managing payment requests	Disabled
Social networks	Integration with social applications and networks like Twitter and Facebook	Disabled
Share	Add a "Share" link in all pages to send it via email, Twitter, Facebook, message or forums  <i>Be careful when allowing anonymous users to activate the antibot feature.</i>	Disabled
Webmail	Provides a webmail interface for site users' own IMAP or POP accounts. 	Disabled
Mail-in	Create and publish wiki pages and articles via email	Disabled
Docs (WebODF)	Docs enables viewing and editing Open Document Format files 	Disabled
Slideshow (reveal.js)	Create simple presentations via Wiki Syntax.	Disabled
Slideshow (reveal.js) PDF export	Wiki-page-based slideshow to pdf export 	Disabled
Time sheet	A project time manager 	Disabled
FAQs	Frequently asked questions and answers  <i>There has been discussion about this feature being retired, so keep in mind that normal wiki pages can be used to create and display FAQs.</i> 	Disabled
Image gallery	Collections of images for viewing or downloading (photo albums) 	Disabled
Progressive Web Application Mode	Allow Tiki to be used offline and be installed in a mobile device.  <i>Experimental feature.</i> <i>Only Wiki pages and Trackers are available offline for now.</i> 	Disabled

Option	Description	Default
Tiki connect	Connect your Tiki with the community by sending anonymised statistical data to tiki.org  <i>This feature is still under development.</i> 	Disabled
Kaltura video management	Integration with the Kaltura video management platform	Disabled
Zotero bibliography	Connect Tiki to the Zotero online bibliography management system.  <i>You must supply the following items: Zotero Client Key, Zotero Client Secret, Zotero Group, and Zotero Reference Style.</i>	Disabled
Zotero client key	Required identification key. Registration required.	None
Zotero client secret	Required identification key. Registration required.	None
Zotero group ID	Numeric ID of the group, can be found in the URL.	None
Zotero reference style	Use an alternate Zotero reference style when formatting the references. The reference formats must be installed on the Zotero server.	None

# Features -Â Interface

Option	Description	Default
Element Plus	Use Element Plus Vue based UI elements 	Disabled
Autocomplete	Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc.	Disabled
Clearable Select	whether select can be cleared	Disabled
Collapsible Tags	whether to collapse tags to a text when multiple selecting	Disabled
Max Collapse Tags	max tags to show when collapsed	3
Filterable Select	whether select can be filtered	Disabled
Allow Create	whether creating new items is allowed	Disabled
Sortable	whether selected items can be re-ordered via drag and drop	Disabled
Autocomplete	Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc. 	Enabled
Reflection	Creates a reflection under an image. Used in Plugin Img with the parameter "class=reflect"	Disabled
SmartMenus	Add "SmartMenus" to Bootstrap menus. See smartmenus.org for more.	Enabled

Option	Description	Default
SmartMenus collapsible behavior	Parent items behavior in collapsible (mobile) view. ☰ Default   Toggle   Link   Accordion   Accordion toggle   Accordion link	Default
SmartMenus open/close on click	Use mouse clicks to open/close item/sub menus	Disabled
TagCanvas	TagCanvas is a Javascript class which will draw and animate an HTML5 canvas-based tag cloud.	Enabled
Query UI theme	jQuery UI theme. Used in some modal popups and in the TikiSheet feature, etc. 🖌️ ☰ None   black-tie   blitzer   cupertino   dark-hive   dot-luv   eggplant   excite-bike   flick   hot-sneaks   humanity   le-frog   mint-choc   overcast   pepper-grinder   redmond   smoothness   south-street   start   sunny   swanky-purse   trontastic   ui-darkness   ui-lightness   vader	Flick
Query UI	Include jQuery UI library. Enables a number of interface features. ⚠️ <i>This feature is required for the interface for many features to work properly.</i>	Enabled
Validation	Provides various validation possibilities such as for trackers.	Enabled
Query zoom	Enables zoom in images on mouseover or click. Used in Plugin Img with the parameter "thumb=zoombox"	Disabled
Query Select2 Select Boxes	Styled replacement for dropdown select lists and multiple-select inputs.	Enabled
Sortable Select2 Multi-selects	Enable drag and drop re-ordering of Select2 multi-select options.	Disabled
FitVids.js	jQuery plugin for fluid-width (responsive) embedded videos.	Disabled
FitVids.js additional domains	Youtube and Vimeo are supported by default. Also apply FitVids.js to videos from these domains.	None
Query Timeago	jQuery plugin for fuzzy timestamps.	Disabled
Query Double Scroll	jQuery plugin which adds an extra horizontal scroll bar at the top.	Disabled
Allow image lazy loading	Allow that images are loaded in a lazy way	Disabled
Prefix CSS	Use -prefix-free JavaScript library to add vendor specific css prefixes. ⚠️ <i>May be replaced by a server-side option soon.</i> 🛠️	Disabled
Query infinite carousel	Create a slideshow (like an image carousel) for file galleries. Used in Plugin Carousel.	Disabled
Query sortable tables	Provides an interactive way to sort and filter data in tables produced with Plugin FancyTable and Plugin TrackerList, as well as administrative tables.	Disabled
Enable Vue.js	Loads the vue.js library. 🛠️	Enabled
Always Load Vue.js	Loads the vue.js library for every page.	Enabled
Vue.js Deployment Mode	Selects which vue.js library is used. ☰ Production full (minified)   Production runtime (minified)   Development full   Development runtime only	Production full (minified)

Option	Description	Default
Tracker Field Rules	Conditional rules for tracker fields. ⚠️ <i>Experimental new feature, expect some issues.</i> 🚫	Enabled
Option	Description	Default
Ajax	Allows for efficient retrieval and display of information from the server, thus improving the user experience. This feature is required for the interface for many features to work. ⚠️ <i>This feature is required for the interface for many features to work properly.</i>	Enabled
Ajax auto-save	Save content during editing, enabling work to be recovered after any interruption. Also enable a real-time preview. This option is required for WYSIWYG plugin processing.	Enabled
Autocomplete	Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc.	Enabled
Reflection	Creates a reflection under an image. Used in Plugin Img with the parameter "class=reflect"	Disabled
SmartMenus	Add "SmartMenus" to Bootstrap menus. See smartmenus.org for more.	Enabled
SmartMenus collapsible behavior	Parent items behavior in collapsible (mobile) view. ☰ Default   Toggle   Link   Accordion   Accordion toggle   Accordion link	Default
SmartMenus open/close on click	Use mouse clicks to open/close item/sub menus	Disabled
Tooltips	Enable tooltips such as this to have a custom appearance, styled by CSS.	Enabled
TagCanvas	TagCanvas is a Javascript class which will draw and animate an HTML5 canvas-based tag cloud.	Enabled
Query UI theme	jQuery UI theme. # File galleries - Enhancements

Option	Description	Default
WebDAV access to Tiki	Allow file gallery access with WebDAV <a href="#">👉 use tiki-webdav.php as the URI of the WebDAV repository</a> 🚫	Disabled
Use elFinder UI	Alternative file manager with drag and drop capability	Enabled
Use elFinder on Toolbars	Use elFinder in the popup on toolbar FileGallery buttons	Enabled
Enable elFinder debug mode	Shows errors and warnings in the elFinder window and adds debugging information to service calls.	Disabled
Docs (WebODF)	Docs enables viewing and editing Open Document Format files 🚫	Disabled
Use PDF.js	Uses PDF.js to display PDF files in web pages	Disabled
H5P support	Handle H5P package files on upload. H5P enables the creation, sharing and reusing of interactive HTML5 content.	Disabled
Default Gallery	File gallery to create new H5P content in by default.	1

Option	Description	Default
Whitelist	Allowed filetypes	json png jpg jpeg gif bmp t...
H5P Developer Mode	Use "patched" libraries?	Disabled
H5P Tracker User	Store H5P results	Disabled
Store user state	Allows users to resume at the point they last got to	Disabled
Save Frequency	How often to update user data.	60 seconds
Export	Allows users to export H5P content	Disabled
Hub Is Enabled	Updates libraries from h5p.org	Enabled
Site Key	H5P Site Key.  <i>Experimental</i>	None
H5P UUID	H5P Unique ID.  <i>Experimental</i>	None
Content Type Updated	Last update.  <i>Experimental</i>	0 seconds
Check Requirements	Unused so far	Enabled
Send Usage Statistics	Unused so far  <i>Experimental</i>	Disabled
Request User Consent	Unused so far  <i>Experimental</i>	Disabled
LRS Content Types	Reporting (?)  <i>Experimental</i>	Disabled
Custom H5P Javascript Files	Comma-separated: library or "*" for all, path to the file and optional version number, one per line.  <i>For example: H5P.Timeline,themes/js/h5p-custom-example.js,1.00</i>	None
Custom H5P CSS Files	Comma-separated library or "*" for all, path to the file and optional version number, one per line.  <i>For example: H5P.Timeline,themes/css/h5p-custom-example.css,1.00</i>	None
Draw (SVG edit)	Draw enables creating and editing SVG images in all wiki text areas	Disabled
Draw (SVG edit) hide buttons	Hide buttons in Draw, HTML id, comma-separated.  <i>Example: "tool_select, tool_fhpath, tools_line_show, tools_rect_show, tools_ellipse_show, tool_path, tools_shapelib_show, tool_text, tool_image, tool_zoom, tool_eyedropper"</i> 	None
Separate base image	Leaves the initially edited image as a separate file and stores the drawing separately 	Disabled

Option	Description	Default
Draw in user file gallery	Users' drawings are stored in their user files gallery 🚫	Disabled
SCORM support	Handle SCORM package files on upload. SCORM is a standard used in learning management systems.	Disabled
SCORM Tracker	The ID number of the tracker used to store SCORM metadata	0
Vimeo upload	Enables video upload to the Vimeo service. API keys are required and approval must be granted by Vimeo for the upload API.	Disabled
Vimeo delete	Causes videos uploaded to the Vimeo service via Tiki file galleries to be deleted when the Tiki file is deleted. ⚠️ <i>Permanently removes videos from the registered vimeo.com account.</i>	Disabled
Vimeo Default Gallery	The The ID of the default file gallery in which to store the Vimeo reference	1
Vimeo consumer key	API consumer key	None
Vimeo consumer secret	API consumer secret	None
Vimeo access token	The access token that is automatically generated by Vimeo when API keys are requested.	None
Vimeo access token secret	The access token secret automatically generated by Vimeo when API keys are requested	None

Option	Description	Default
WebDAV access to Tiki	Allow file gallery access with WebDAV 👉 <i>use tiki-webdav.php as the URI of the WebDAV repository</i> 🚫	Disabled
Use eFinder UI	Alternative file manager with drag and drop capability	Enabled
Use eFinder on Toolbars	Use eFinder in the popup on toolbar FileGallery buttons	Enabled
Enable eFinder debug mode	Shows errors and warnings in the eFinder window and adds debugging information to service calls.	Disabled
Docs (WebODF)	Docs enables viewing and editing Open Document Format files 🚫	Disabled
Use PDF.js	Uses PDF.js to display PDF files in web pages	Disabled
H5P support	Handle H5P package files on upload. H5P enables the creation, sharing and reusing of interactive HTML5 content.	Disabled
Default Gallery	File gallery to create new H5P content in by default.	1
Whitelist	Allowed filetypes	json png jpg jpeg gif bmp t...
H5P Developer Mode	Use "patched" libraries?	Disabled
H5P Tracker User	Store H5P results	Disabled
Store user state	Allows users to resume at the point they last got to	Disabled

Option	Description	Default
Save Frequency	How often to update user data.	60 seconds
Export	Allows users to export H5P content	Disabled

# File galleries - General settings

Option	Description	Default
File gallery	Storage of files of various formats to display or download, etc. With check-in and check-out (lock) capability	Enabled
Home file gallery (main file gallery)	Select the default file gallery ☰ File Galleries   Branding Graphics   colorbox   Documentation temporarily in P   Drawings   Example EPSG:4326 geoJSON boun   Example EPSG:4326 geoJSON path   Example map object images   Example POI icons   exportet-structures-francais,c   Fonctionnalit� Articles   G�rer les Utilisateurs   H5P Content   Images for plugin Diagram   Images for slideshows   Images for the Documentation p   Images...	Images for slideshows
Description	☰ Hide   Show as a column   Show in popup box   Both	Show in popup box
Storage	Specify if uploaded files should be stored in the database or file directory. ☰ Store in database   Store in directory	Store in database
Preserve filenames	Preserve original filename instead assigning a hash as name	Disabled
Path to the directory to store file gallery files	Specify a directory on this server, for example: /var/www/ It's recommended that this directory not be web-accessible. PHP must be able to read/write to the directory.	storage/fgal/
Podcast directory	File system directory for storing podcast files 👉 <i>The server must be able to read/write the directory. Required for podcasts.</i>	files/
Rankings	Users can view the '�top' or '�most' downloaded files.	Disabled
File gallery comments	Users with permission may post threaded comments. The comments will appear at the bottom of the page.	Disabled
Display ZIP option in gallery	Users can upload a .zip (archive file). Tiki will automatically un-zip the archive and add each file to the gallery..	Disabled
Allow download limit per file		Disabled
Prevent download if score becomes negative	If using Tiki Score system, users with a negative score cannot download files.	Disabled
Allow file duplicates	Allow the same file to be uploaded more than once. ☰ Never   Yes, even in the same gallery   Only in different galleries	Yes, even in the same gallery

Option	Description	Default
Use jQuery upload	Use the improved Tiki 15+ upload page	Enabled
Batch uploading	Direct import of local files into a file gallery. This method can handle large files. The user can upload files via FTP to the target folder. It is highly recommended to use a file directory as the file gallery storage when using this feature.	Disabled
Path	 <i>To enable and use directory batch loading, set up a web-readable directory (preferably outside the web space). Then upload files to that directory, such as with SCP, FTP, etc The server must be able to read the directory. The directory can be outside the web space.</i>	None
Require file creator's name for anonymous uploads		Disabled
Automatic deletion of old files	The user will have an option when uploading a file to specify the time after which the file is deleted  <i>A cron job must be set up in order to delete the files.</i>	Disabled
Deletion emails notification	Email addresses (comma-separated) to receive a copy of each deleted file	None
Keep the same file ID for the latest version of a file	If the checkbox is checked, the file ID of the latest version of a file stays the same. A link to the file will always link to the latest version. If not checked, each version of the file is assigned its own file ID, so a link to the file will be to a specific version of the file	Enabled
Store user files in a file gallery	 <i>Use the file gallery admin and the individual file gallery settings to manage file storage preferences.</i> 	Disabled
Use file galleries for wiki attachments	Wiki attachments will be stored in the file gallery. This is the preferred way to store attachments starting Tiki 26+.	Enabled
Save files as drafts	Allow saving of files as drafts	Disabled
File gallery configuration templates		Disabled

Option	Description	Default
Allow searching for existing files in the tracker files field	Search files using the search index.	Enabled
Set MIME type based on file suffix	Sets the MIME type of an image file according to the file suffix when it is incorrectly detected as application/octet-stream 🚫	Disabled
Clean XML Always	Sanitize XML based files such as SVG for all users.	Enabled
Allow SVG file upload	Because SVG files may contain malicious code and compromise system security, specifically grant permission to upload SVG files..	Disabled
Upload files from remote source	Enable copying files to file galleries from a URL that will be polled for new revisions.	Disabled
Domains	Allowed domains 👉 <i>One domain per line</i>	None
Remote source refresh frequency limit	Minimum number of seconds to elapse between remote source checks to prevent flooding the server with requests. 👉 <i>Set to zero to disable refresh</i>	3600 seconds
Display controls to attempt a file refresh	Let users trigger a refresh attempt from the remote host.	Disabled
Validate uploaded file content	Do not trust user input and open the files to verify their content.	Enabled
Redirect to file gallery	If enabled, redirect all requests to images that were migrated from the image gallery to the corresponding file in the file gallery	Disabled
View or export office documents as PDF	If enabled allows to view documents without download or to export documents as PDF files	Disabled
Maximum width of file preview in pixels	The maximum value of width in pixels for the files preview in the popover.	250

Option	Description	Default
Quota for all files and archives	The total size of files uploaded to all the file galleries or to a specific file gallery can be limited. The quota for a file gallery applies to that file gallery and all the file galleries under it. When the limit is reached, no more files can be uploaded. The user will see an explanatory error message. An email can be sent via the Mail notifications feature.)  <i>0 for unlimited</i>	0 megabytes
Quota for each file gallery	A different quota can be defined for each file gallery.	Disabled
Default quota for each new gallery	 <i>0 for unlimited</i>	0 megabytes
Must match	A regular expression that must be matched to accept the file example A-Za-z* (filename can only have a-z letters) For example, if you want to require that uploads must have a wordprocessing file extension, you could enter .*(odt sxw doc dot rtf wpt frm wpd txt ODT SXW DOC DOT RTF WPT FRM WPD TXT)	None
Cannot match	A regular expression that, if matched, causes the file to be rejected. For example, .gif rejects gif images. Note that the period must be escaped since a regular expression is being used. If you donâ€™t know anything about regular expressions just leave the fields blank and all the files will be accepted.	None
ffmpeg path	Path to the location of the ffmpeg binary	/usr/bin/ffmpeg
ffprobe path	Path to the location of the ffprobe binary	/usr/bin/ffprobe
unoconv path	Path to the location of the unoconv binary.	/usr/bin/unoconv
unoconv timeout	The maximum amount of time for unoconv to execute.	60 seconds
unoconv port	unoconv running port.	2002
ghostscript path	Path to the location of the ghostscript binary.	/usr/bin/gs
Alchemy Image library	Select either Image Magick or GD Graphics Library.  Imagemagick   GD	Imagemagick
Export diagram image on save	If enabled, diagrams will be cached in PNG format when saved or edited.	Enabled
Use locally CasperJS to export images	If enabled, diagrams can be exported using CasperJS.	Disabled

Option	Description	Default
Use draw.io public services to export images	When exporting PDFs, if this setting is enabled, diagram images will be fetched using Drawio's services if not in cache. This basically works like a fallback.	Disabled
Draw.io service endpoint	Configure the draw.io service endpoint to export the diagram images.	https://convert.diagrams.ne..
Use diagram compression by default	if this setting is enabled, diagram will use compression by default.	Enabled
Use RecordRTC to screen record	if this setting is enabled, will use RecordRTC to record the screen activity. 🚫	Disabled
Gallery default for RecordRTC recordings	Select gallery to be used as the default target for RecordRTC recordings ☰ File Galleries   Branding Graphics   colorbox   Documentation temporarily in P   Drawings   Example EPSG:4326 geoJSON boun   Example EPSG:4326 geoJSON path   Example map object images   Example POI icons   exportet-structures-francais,c   FonctionnalitÃ© Articles   GÃ©rer les Utilisateurs   H5P Content   Images for plugin Diagram   Images for slideshows   Images for the Documentation p   Images... 🚫	None

Draw.io service endpoint	Configure the draw.io service endpoint to export the diagram images.	<code>https://convert.diagrams.ne..</code>
Use diagram compression by default	if this setting is enabled, diagram will use compression by default.	Enabled
Use RecordRTC to screen record	if this setting is enabled, will use RecordRTC to record the screen activity. 🚫	Disabled

Option	Description	Default
File gallery	Storage of files of various formats to display or download, etc. With check-in and check-out (lock) capability	Enabled

Option	Description	Default
Home file gallery (main file gallery)	Select the default file gallery ☰ No file gallery available (create one first)	1
Description	☰ Hide   Show as a column   Show in popup box   Both	Show in popup box
Storage	Specify if uploaded files should be stored in the database or file directory. ☰ Store in database   Store in directory	Store in database
Preserve filenames	Preserve original filename instead assigning a hash as name	Disabled
Path to the directory to store file gallery files	Specify a directory on this server, for example: <code>/var/www/</code> It's recommended that this directory not be web-accessible. PHP must be able to read/write to the directory.	<code>storage/fgal/</code>
Podcast directory	File system directory for storing podcast files 👉 <i>The server must be able to read/write the directory. Required for podcasts.</i>	<code>files/</code>
Rankings	Users can view the "œtop" or "œmost" downloaded files.	Disabled
File gallery comments	Users with permission may post threaded comments. The comments will appear at the bottom of the page.	Disabled
Display ZIP option in gallery	Users can upload a .zip (archive file). Tiki will automatically un-zip the archive and add each file to the gallery..	Disabled
Allow download limit per file		Disabled
Prevent download if score becomes negative	If using Tiki Score system, users with a negative score cannot download files.	Disabled
Allow file duplicates	Allow the same file to be uploaded more than once. ☰ Never   Yes, even in the same gallery   Only in different galleries	Yes, even in the same gallery
Use jQuery upload	Use the improved Tiki 15+ upload page	Enabled
Batch uploading	Direct import of local files into a file gallery. This method can handle large files. The user can upload files via FTP to the target folder. It is highly recommended to use a file directory as the file gallery storage when using this feature.	Disabled
Path	👉 <i>To enable and use directory batch loading, set up a web-readable directory (preferably outside the web space). Then upload files to that directory, such as with SCP, FTP, etc The server must be able to read the directory. The directory can be outside the web space.</i>	None

Option	Description	Default
Require file creator's name for anonymous uploads		Disabled
Automatic deletion of old files	The user will have an option when uploading a file to specify the time after which the file is deleted ⚠️ <i>A cron job must be set up in order to delete the files.</i>	Disabled
Deletion emails notification	Email addresses (comma-separated) to receive a copy of each deleted file	None
Keep the same fileid for the latest version of a file	If the checkbox is checked, the file ID of the latest version of a file stays the same. A link to the file will always link to the latest version. If not checked, each version of the file is assigned its own file ID, so a link to the file will be to a specific version of the file	Enabled
Store user files in a file gallery	<a href="#">👉</a> <i>Use the file gallery admin and the individual file gallery settings to manage file storage preferences.</i> 🛠️	Disabled
Use file galleries for wiki attachments	Wiki attachments will be stored in the file gallery. 🛠️	Disabled
Save files as drafts	Allow saving of files as drafts	Disabled
File gallery configuration templates	🛠️	Disabled
Allow searching for existing files in the tracker files field	Search files using the search index.	Enabled
Set MIME type based on file suffix	Sets the MIME type of an image file according to the file suffix when it is incorrectly detected as application/octet-stream 🛠️	Disabled
Clean XML Always	Sanitize XML based files such as SVG for all users.	Enabled
Allow SVG file upload	Because SVG files may contain malicious code and compromise system security, specifically grant permission to upload SVG files..	Disabled

Option	Description	Default
Upload files from remote source	Enable copying files to file galleries from a URL that will be polled for new revisions.	Disabled
Remote source refresh frequency limit	Minimum number of seconds to elapse between remote source checks to prevent flooding the server with requests.  <i>Set to zero to disable refresh</i>	3600 seconds
Display controls to attempt a file refresh	Let users trigger a refresh attempt from the remote host.	Disabled
Validate uploaded file content	Do not trust user input and open the files to verify their content.	Enabled
Redirect to file gallery	If enabled, redirect all requests to images that were migrated from the image gallery to the corresponding file in the file gallery	Disabled
View or export office documents as PDF	If enabled allows to view documents without download or to export documents as PDF files	Disabled
Maximum width of file preview in pixels	The maximum value of width in pixels for the files preview in the popover.	250
Quota for all files and archives	The total size of files uploaded to all the file galleries or to a specific file gallery can be limited. The quota for a file gallery applies to that file gallery and all the file galleries under it. When the limit is reached, no more files can be uploaded. The user will see an explanatory error message. An email can be sent via the Mail notifications feature.)  <i>0 for unlimited</i>	0 megabytes
Quota for each file gallery	A different quota can be defined for each file gallery.	Disabled
Default quota for each new gallery	 <i>0 for unlimited</i>	0 megabytes
Must match	A regular expression that must be matched to accept the file example A-Za-z* (filename can only have a-z letters) For example, if you want to require that uploads must have a wordprocessing file extension, you could enter <code>.*(odt sxw doc dot rtf wpt frm wpd txt ODT SXW DOC DOT RTF WPT FRM WPD TXT)</code>	None

Option	Description	Default
Cannot match	A regular expression that, if matched, causes the file to be rejected. For example, <code>.gif</code> rejects gif images. Note that the period must be escaped since a regular expression is being used. If you don't know anything about regular expressions just leave the fields blank and all the files will be accepted.	None
ffmpeg path	Path to the location of the ffmpeg binary	<code>/usr/bin/ffmpeg</code>
ffprobe path	Path to the location of the ffprobe binary	<code>/usr/bin/ffprobe</code>
unoconv path	Path to the location of the unoconv binary.	<code>/usr/bin/unoconv</code>
unoconv timeout	The maximum amount of time for unoconv to execute.	60 seconds
unoconv port	unoconv running port.	2002
ghostscript path	Path to the location of the ghostscript binary.	<code>/usr/bin/gs</code>
Alchemy Image library	Select either Image Magick or GD Graphics Library. ☰ Imagemagick (Extension not loaded)   GD	Imagemagick (Extension not ...)
Export diagram image on save	If enabled, diagrams will be cached in PNG format when saved or edited.	Enabled
Use locally CasperJS to export images	If enabled, diagrams can be exported using CasperJS.	Disabled
Use draw.io public services to export images	When exporting PDFs, if this setting is enabled, diagram images will be fetched using Drawio's services if not in cache. This basically works like a fallback.	Disabled

# File galleries - Search indexing

Option	Description	Default
Automatic indexing of file content	Uses command line tools to extract the information from the files based on their MIME types.	Disabled
Automatic indexing of emails stored as files	Parses message/rfc822 types of files (aka eml files) and stores individual email headers and content in search index.	Disabled
Asynchronous indexing		Enabled
OCR Files	Extract and index text from supported file types.	Disabled
OCR Every File	Attempt to OCR every supported file.	Disabled
Allow file level OCR languages	Allow users to change the default languages that will be used to OCR a file.	Enabled
OCR limit languages	Limit the number of languages one can select from this list. ☰ Auto detect languages   Afrikaans (Afrikaans)   Albanian (Shqip)   Amharic (ጎጎ ልጎ ልጎ ልጎ)   Arabic   Arabic (Ø§Ù„Ø±Ø±Ø±Ø±Ø±)   Armenian   Armenian (Օ՛Օ՛Օ՛Օ՛Օ՛Օ՛Օ՛)   Assamese (à!...à!_à!@à\$€à!~à!¼à!¾)   Azerbaijani (azÉ™rbaycan dili)   Azerbaijani (azÉ™rbaycan dili) (cyrl)   Basque (euskara, euskera)   Belarusian (Ð±Ð¼Ð»Ð°ÑŒÑŒÑŒÐ°ÑŒ Ð¼¼Ð¾Ð²Ð°)   Bengali   Bengali (à!¬à!¾à!¾à!¾)   Bosnian (bos...	None
tesseract path	Path to the location of the binary. Defaults to the \$PATH location. 👉 <i>If blank, the \$PATH will be used, but will likely fail with scheduler.</i>	/usr/bin/tesseract
pdfimages path	Path to the location of the binary. Defaults to the \$PATH location. 👉 <i>If blank, the \$PATH will be used, but will likely fail with scheduler.</i>	Pdfimages
