

# Semantic Wiki Links

This is a new feature since [Tiki3](#)

It allows definition of semantic relationships between wiki pages; i.e. the type of relationship between linked pages. Examples include: state and capital, plural and singular, male and female of the same concept, synonyms , antonyms , acronyms, etc.

[Semantic Alias](#) is included in each Tiki install, and you can create your own.

If you are looking to adding structured data to wiki pages, please see: [Pretty Tracker](#)

For more information, please see the related pages:
