

# Shadow Layer tab

## Overview

Use this tab to select your Tiki theme and options, and other template configurations.

## To Access

From the Look and Feel Admin page, click the **General Layout Options** tab.

## Note

You must have your 'site layout' set to classic in order to see this tab. These options are for legacy support only.

The screenshot shows the 'Look & Feel' admin interface with the 'Shadow layer' tab selected. The interface includes a navigation bar with tabs for 'Theme', 'General Layout', 'Shadow layer', 'Pagination', 'UI Effects', and 'Customization'. Below the navigation bar, the 'Shadow layer' section is active, featuring a checked checkbox and a description: 'Additional layers for shadows, rounded corners or other decorative styling'. The configuration area contains ten rows of color pickers, each with a label on the left and a pink color swatch on the right. The labels are: 'Main shadow start', 'Main shadow end', 'Header shadow start', 'Header shadow end', 'Middle shadow start', 'Middle shadow end', 'Center shadow start', 'Center shadow end', 'Footer shadow start', and 'Footer shadow end'. At the bottom of the configuration area, there is an 'Apply' button.

Shadow Layer tab

<b>Option</b>	<b>Description</b>
Shadow layer	This is a legacy but useful option that activates extra divs in the site layout template file that can be used for styling purposes. Not all site layout templates (selected under the "Theme" tab) support this feature.
Main shadow start	The tag and the contents of this textarea are placed just below the top of the HTML body
Main shadow end	The closing tag of id="main-shadow" and the content of this textarea are placed just before the body closing tag.
Header shadow start	The tag and the contents of this textarea are placed just before the page-header divs.
Header shadow end	The closing tag of id="header-shadow" and the contents of this textarea are placed just after the page-header divs.
Middle shadow start	The tag and the contents of this textarea are placed just before the middle of the page divs.
Middle shadow end	The closing tag of id="middle-shadow" and the contents of this textarea are placed just after the middle of the page divs.
Center shadow start	The tag and the contents of this textarea are placed just before the center-column div.
Center shadow end	The closing tag of id="center-shadow" and the contents of this textarea are placed just after the center-column div.
Footer shadow start	The tag and the contents of this textarea are placed just before the page footer div.
Footer shadow end	The closing tag of id="footer-shadow" and the contents of this textarea are placed just after the page-footer div.
Module (box) shadow start	The tag and the contents of this textarea are placed just before each module div (a module in Tiki parlance is a container like a Bootstrap panel).
Module (box) shadow end	The closing tag of class="box-shadow" and the contents of this textarea are placed just after each module div.
