## SHIPPING OVERVIEW

Basic integration with carrier APIs. At this time, this is mostly a developer feature (see dev site [Shipping](#)).

Supported carriers:

- FedEx
- UPS
- See: <http://sourceforge.net/p/tikiwiki/code/HEAD/tree/trunk/lib/shipping/>

# FEDEX

To use the FedEx carrier, you must obtain an API key for your account. The FedEx API requires a certification of the application. For the features included in Tiki, the *Standard Certification* is required. Luckily, for this level of certification, one can *Self-certify*, meaning you only have to apply for it.

- Obtain a test key or
- Obtain a production key. Only request the key for *FedEx Web Services for Shipping*.
