SLIDER COMPARISON

Tiki includes several content sliders (also known as carousels, image rotaters, swipers, or slide shows) that can be used to display a series of images or other content. This table is to provide some help in deciding which one to use.

Slider Name	Plugin Name
Swiper	PluginSwiper (wikiplugin_swiper)
Bootstrap Carousel	List (wikiplugin_list) PluginList output control block

Active

Pluses

Lots of features. See http://swiperjs.com/demos/

Works with List wiki plugin.

Minuses

No plugin help modal.

Sparse Tiki documentation.

Depends on Search, which adds a layer of complexity (for example, search set up and index rebuilding).
