

Text Tracker Field

This field type creates a simple text field that is not wiki-parsed.

Parameter	value
next	1 or empty
size	numeric
prepend	text
append	text
max	numeric
autocomplete	y or n

description

empty: next field on next row, 1: next field on same row

text to be displayed before the field value

text to be displayed after the field value

maximum number of characters that can be saved

if y (default n) will propose an autocomplete on the values of the field (if multilingual, will propose only the values in the associated language)

version

tw >= 4.0

Note:

- The text is not wiki parsed and the html is not interpreted (if you want it wiki parsed, use a textarea field)
- if you want to specify the size of the text but not to put the next field on the same line, you have to enter the parameter like

,50

or

0,50
