

# Tiki Manager Tracker Field

new in [Tiki25](#), this [tracker field](#) permits to use the [Tiki Manager Package](#) from a tracker. The typical use case is to track a list of Tiki powered sites, with additional information about these instances. This is similar to [Show.t.o Tracker Field](#), but more generic. See also: [PluginTikiManager](#) and development ideas: [Tiki Manager within Tiki](#).

Source code:

- <https://gitlab.com/tikiwiki/tiki/-/blob/master/lib/core/Tracker/Field/TikiManager.php>
- <https://gitlab.com/tikiwiki/tiki/-/blob/master/templates/trackerinput/tikimanager.tpl>

It should be possible to use along with [Realtime](#).
