Transactional Email Providers

New in Tiki24

Leveraging SlmMail, Tiki can send transactional emails (Password reset, notification of a wiki page update, etc.) via services such as:

- Mailgun
- Postmark
- Postage
- Send Grid
- Spark Post
- Amazon SES
- and others...

Why?

Because sending emails via Tiki (sendmail) or SMTP can cause issues: Limits on numbers of emails sent, slow delivery, lost emails, mails flagged as spam, etc. Basically because there is so much spam, legitimate projects suffer. The good news is that some services offer free to use entry level services (To promote the service so you upgrade to paid services as your needs grow). The bad news is a loss of data privacy.

How to use

Configure in the **Mail** section of tiki-admin.php?page=general

Mail sender	Mailgun	× ∧
	🔍	
Mailgun Domain	✓ **Mailgun**	
	Mandrill	
Mailgun Key	Postage	
Mailgun API Endpoint	Postmark	
	SendGrid	
SMTP server	SparkPost	

About the code

SlmMail is an "Integration of various email service providers in the Laminas\Mail". Since Tiki also already uses laminas/laminas-mail, it is very nice extra functionality with minimal complexity/overhead. laminas/laminas-mail is the continuation of Zend\Mail, which has been added to Tiki in Tiki11 (2013).
