

# Parameters

| Parameter  | Value           |
|------------|-----------------|
| preference | password, email |

About Tiki4.0+, we also have

| Parameter  | Value                     |
|------------|---------------------------|
| preference | realName, ... (see below) |

Tiki 6.0+, we also have  
have

| Parameter  | Value    |
|------------|----------|
| preference | language |

# Configuration

- the tracker must have a user field of type 1 that will give the user name.
- you might need to set Admin Home / Community / User Preferences Screen on (e.g. for realName)

## How to find out which preferences can be used?

(the result shown below is from a Tiki22)

```
MariaDB [xxx_tiki22]> select distinct prefName from tiki_user_preferences order by prefName; +-----+ |
prefName | +-----+ | admin_recent_prefs | | allowMsgs | | country | | default_calendars | | diff_versions | |
display_12hr_clock | | display_timezone | | email is public | | filegals_automupload | | gender | | homePage | | language | | lat | | lon
| | mailCharset | | mailCurrentAccount | | mess_archiveAfter | | mess_maxRecords | | mess_sendReadStatus | | minPrio | |
mytiki_articles | | mytiki_blogs | | mytiki_forum_replies | | mytiki_forum_topics | | mytiki_gals | | mytiki_items | | mytiki_msgs | |
mytiki_pages | | mytiki_tasks | | objectperm_admin_features | | objectperm_admin_groups | | perspective_preferred | | pref_filters
| | read_language | | realName | | remember_closed_rboxes | | show_mouseover_user_info | | tasks_maxRecords | | user_db | |
user_information | | userbreadCrumb | | xmpp_custom_server_http_bind | | xmpp_jid | | xmpp_password | +-----+
44 rows in set (0.007 sec)
```

# Note

As of Tiki 16.x, while you can use some field like country and user\_information, they show up just as text fields and don't provide a drop down.

# Links

- I wanna create custom user preferences
- The old wish log More preference to come in future versions (Full name, avatar, etc) ...
