

User Preferences

The User Preferences page is where the user can set his or her personal preferences for the site: user name, photo, time zone, theme, language, etc. The preference options at any particular Tiki site may differ from those described here, depending on which options the site administrators have activated. Also, these are personal settings and shouldn't be confused with the general site-wide [Preferences](#) that the site administrators configure.

NAVIGATING TO THE USER PREFERENCE PAGE

If enabled from the admin menu, you will see a link to user **MyAccount > Preferences** in the application menu (if this menu is activated). This page, located at `tiki-user_preferences.php`, is for registered users (users logged in at the site) where they can set a number of personal preferences about the site, and where they can see some statistics and links to pages, blogs or galleries, etc. they have created.

The user can change his or her email, visual theme, indicate his or her real name, homepage, and find a link to access a personal wiki page as well as a link to edit the page.

PERSONAL INFORMATION TAB

Note:

When using some types of [external authentication](#) (such as [LDAP Authentication](#)), the user's preferences may not be updatable from within Tiki. You will need to make changes to the host authentication system.

User Information

[Save changes](#)

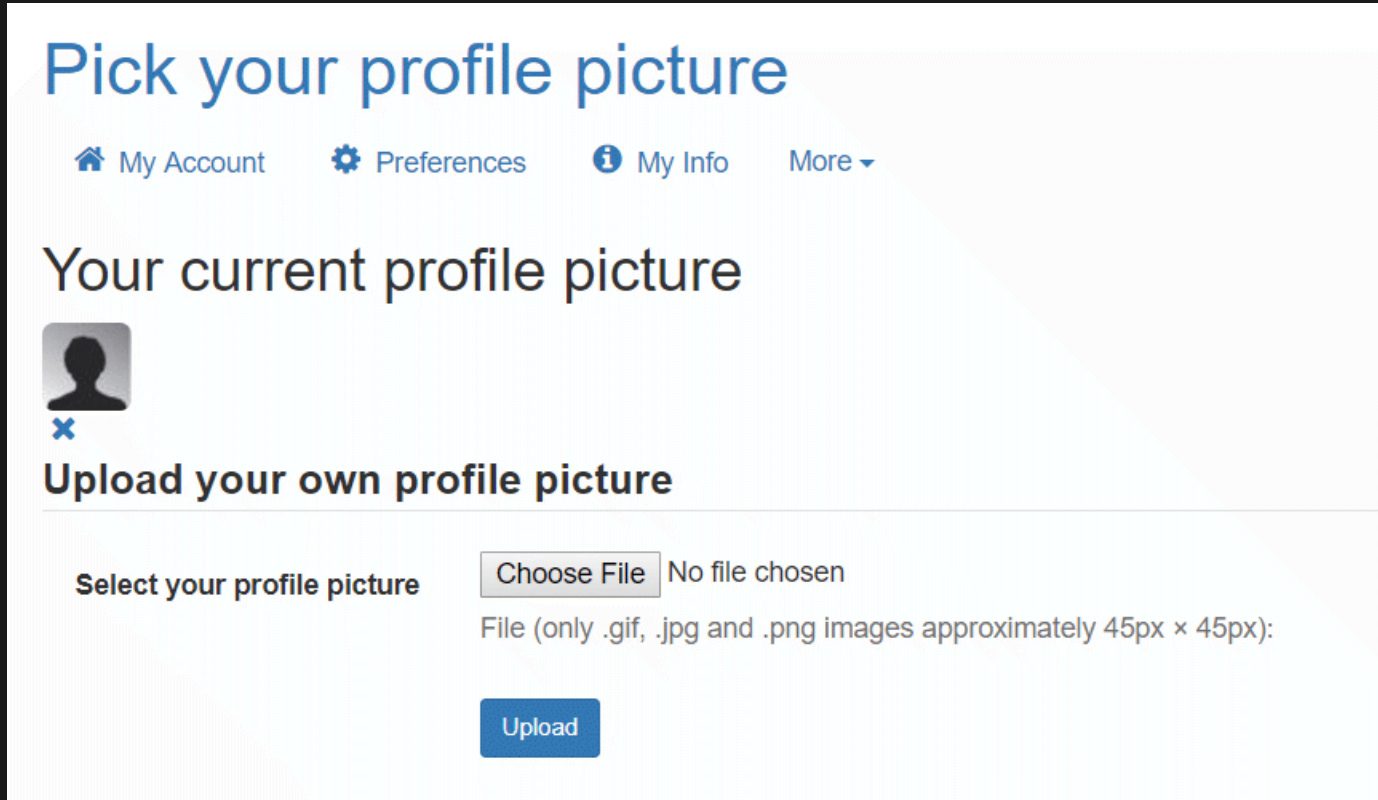

Under this tab, the following information can be viewed and edited:

- User (the user name at the site)
- Real name (There is a global option to use real names where possible throughout the site.)
- Profile picture (see below)
- Country (choose from a list)
- Location (see below)
- Homepage URL (Users with an external website can enter the information here.)
- Your personal wiki page (This page name is generated automatically; each user is the admin of this page.)

- User information (private or public)

USER PROFILE PICTURE

The "Pick user profile picture" link ("My Account > Preferences (Personal Information tab) > Pick user profile picture", **tiki-pick_avatar.php**) enables the user to select an image to represent him or her at the site:

The screenshot shows a user interface for selecting a profile picture. At the top, there is a navigation bar with links for "My Account", "Preferences", "My Info", and "More". Below this, the heading "Pick your profile picture" is displayed in blue. Underneath, the text "Your current profile picture" is shown above a placeholder icon of a person's silhouette. A blue "x" icon is positioned below the placeholder. The section "Upload your own profile picture" is separated by a horizontal line. It contains a "Select your profile picture" label, a "Choose File" button, and the text "No file chosen". Below this, a note specifies "File (only .gif, .jpg and .png images approximately 45px x 45px):". At the bottom of this section is a blue "Upload" button.

To set relevant settings globally (for all site users), the site administrator can configure, on the "User Settings" admin page, under the "User Info and Picture" tab, the following options:

- Use [Gravatar](#) for user profile pictures
- Store full-size copy of profile picture in file gallery

- Size of the small profile picture stored for users (defaults to 45 pixels)
- Crop the profile picture thumbnail to a square
- File gallery in which to store full-size profile picture
- File ID of default profile picture

LOCATION

The user's geographical location can be shown on a map; this uses the open source [OpenLayers](#) technology. To set the location, the link "Search location" will open a search form to enter the user's local address and generate the coordinates for the map location.

PREFERENCES TAB

This screen can be used to set up different themes for users. Basically all the Preferences that can be set at the user level can be found in this screen.

The screenshot shows the 'User Preferences' page with the 'Preferences' tab selected. The 'General settings' section includes the following options:

- Is email public?**: A dropdown menu set to 'no'. Below it, a note says 'If email is public, select a scrambling method to prevent spam'.
- Email character set**: A dropdown menu set to 'utf-8'. Below it, a note says 'Special character set for your email application'.
- Theme**: A dropdown menu set to 'Default Bootstrap'.
- Language**: A dropdown menu set to 'English (en)'. Below it, a link says 'Can you read more languages?'.
- Number of visited pages to remember**: A dropdown menu set to '1'.
- Displayed timezone**: A dropdown menu set to 'Detect user time zone if browser allows, otherwise site default'. Below it are two checkboxes: 'Use 12-hour clock in time selectors' (unchecked) and 'Display info tooltip on mouseover for every user who allows higher information to be public' (unchecked).

The 'User Messages' section includes:

- Messages per page**: A dropdown menu set to '10'.
- Two checkboxes: 'Allow messages from other users' (checked) and 'Notify sender when reading his mail' (checked).
- Message priority notification**: A dropdown menu set to '1 - Lowest'. Below it, a note says 'Send me an email for messages with priority equal to or greater than'.
- Read message auto-archiving**: A dropdown menu set to 'never'. Below it, a note says 'Auto-archive read messages after selected days'.

The 'User Tasks' section includes:

- Tasks per page**: A dropdown menu set to '2'.

The 'My Account' section includes:

- A list of links: 'My pages', 'My blogs', 'My messages', 'My tasks', 'My forum topics', 'My forum replies', 'My user items', and 'My articles'.
- My level**: A dropdown menu set to 'Simple'.
- Keep closed remarkbox hidden**: A checkbox (checked) with a note: 'Remember which remarkbox (alert box) you have closed and don't show them again.'
- Reset remark boxes visibility**: A 'Reset' button.
- A 'Save changes' button at the bottom.

Configuration options under this tab include:
General options

- Is email public? (If email is public, select a scrambling method to prevent spam)
- Email character set (Special character set for your email application)
- Theme (if the site admin has enabled individual users to select a visual theme)
- Language
- Can you read more languages? (links to a form to select other languages; translations of pages, etc. may be available)
- Number of visited pages to remember
- Displayed time zone

- Detect user time zone if browser allows, otherwise site default
 - Use 12-hour clock in time selectors
 - Display info tooltip on mouseover for every user who allows his/her information to be public

User Messages

- Messages per page
 - Allow messages from other users Notify sender when reading his mail
 - Message priority notification (Send me an email for messages with priority equal to or greater than 1 - 5, or none)
- Read message auto-archiving (Auto-archive read messages after selected number of days)

User Tasks

- User Tasks per page

My Account (feature items to include in reports of my activity)

- My pages
- My blogs
- My messages
- My tasks
- My forum topics
- My forum replies
- My user items

- My articles

My level

- My level (simple or advanced) — to choose whether or not to see "advanced" links in menus, as designated by the menu author; could be useful in some contexts.

(About contextual remarks boxes, or alerts)

- Keep closed remarks boxes hidden
- Remember which remarks boxes (alert boxes) I have closed and donâ€™t show them again.
- Reset remark boxes visibility
