# Plain Text

~126~126~126~~126~110~126~~126~112~126~~126~126~126~ produces: ~126~~110~~112~~126~  
~126~126~126~~126~47~126~~126~110~126~~126~112~126~~126~126~126~ produces:  
~126~~47~~110~~112~~126~ !!!Indent Indent is formed by the combination of the ; and : characters. ; must

appear at the beginning of a line and : must appear between introduction text and the indented text. The introduction  
text portion is useful for forming definition type indentation like Example 1 below. However the introduction text can be  
eliminated by simply including ;: together followed by the text as shown in Example 2. ^Example 1: ~np~;Intro Text:

First example of indented text

produces:

**Intro Text**

Indented text

Example 2:

;:2nd example of indented text

2nd example of indented text^

# Using Square Brackets

If you wish to include square brackets in your text (i.e. as regular text and not a link) simply add an additional open bracket to start. E.g.

```
[[this would not be a link]
```

Would render like this...

```
[this would not be a link]
```

# Non-breaking space

Use `~hs~` to add the HTML "`&nbsp;`" for a non-breaking space.

# Entering code

You enter code blocks by enclosing the block between `CODE()` and `CODE` tags (you need to put curly braces around the tags). Note this is a smarty construct, not a Wiki syntax.

## Useful Links

---

- The Color Picker II is located at <http://www.pagetutor.com/pagetutor/makapage/picker/>
- WebDevlopper extension for Mozilla Firefox
- The wiki syntax is not standardised accross applications. There is an initiative to publish the Wiki-Syntax as an RFC from the IETF. See RFCWiki
