

# Module article\_topics

This module generates a list of all topics for articles and a link to view these articles, filtered by that topic.

# Parameters

Lists all article topics with links to their articles.

Go to the source code

*Preferences required:* feature\_articles

---

## Parameters

*no parameters*

---

You can use in a text area (such as a wiki page) with the following code

```
{module module="article_topics"}
```
