

Module Cookie Consent Settings

This module allows users to change their cookie consent preferences.

Usage

This module requires `cookie_consent_feature`. This is how to use the **Cookie Consent Settings** module in a wiki page

```
{module module="cookiesettings"}
```

Parameters

Allows users to change their cookie consent preferences.

[Go to the source code](#)

Preferences required: `cookie_consent_feature`

Parameters	Accepted Values	Description	Default	Since
<code>class</code>	word	Class of the container div. Default "p-2 bg-dark"		
<code>icon</code>	word	Icon to show on the link. Default "cog"		
<code>iconsize</code>	word	Size of icon. Default "2"		
<code>mode</code>	word	Display mode, text, icon or both. Default "icon"		
<code>corner</code>	word	Position on the page, topleft, topright, bottomleft, bottomright or none. Default "bottomleft"		
<code>text</code>	text	Text to show on the link and tooltip. Default "Cookie Consent Settings"		
<code>textclass</code>	word	Class of the text or icon. Default "text-light"		

Example

In the example below we pass in a wiki page the module cookiesettings through the plugin module.
If you encounter this alert:

⚠ Failed to execute "cookiesettings" module

Required features: cookiesettings. If you do not have permission to activate these features, ask the site administrator.

just go ahead and activate the `cookie_consent_feature` feature in the admin panel

So, this code:

```
{module module="cookiesettings"}
```

Produces:

Cookie Consent Settings

And clicking on the icon triggers this cookie consent alert:
