

Admin Wizard / Configuration Wizard

Starting in [Tiki12](#), a wizard shows up for tiki admins when they first log in, enabling them to easily configure the main features of Tiki without the need to navigate through all admin panels. It was initially called "**Admin Wizard**", and renamed later to "**Configuration Wizard**"

Click to expand

Once you start the admin wizard, you will see some screens that will allow you to easily choose the basic initial config settings in these early stages of site set up, without the need to search them through all admin panels.

Show on admin login

CloseBack

Save and Continue

Select Editor type

Select editor type.

Wizard Steps

- Tiki Setup
- Set up Language
- Set up Date and Time
- Set up Login
- Set up Look & Feel
- Select Editor type
- Set up Wysiwyg editor
- Set up Text Area
- Set up Wiki environment
- Set up Auto TOC
- Define Categories
- Set up Structures
- Set up iCapture
- Set up File Gallery & Attachments
- Set up File storage
- Set up Main features
- Set up Search
- Set up User & Community features
- Set up some advanced options
- Set up Namespace
- Admin Wizard Completed!

Select editor type

☐ Only Plain Text Editor (Disable Wysiwyg)

Use only the plain text editor, which is the most stable editor mode and most compatible with Tiki functionality. The Full Wysiwyg Editor will be disabled, but you will still be able to insert wysiwyg sections through the Plain Text editor with [Plugin Wysiwyg](#).

☒ Wysiwyg

Use a What You See is What You Get (Wysiwyg) editor, by default in all new pages or only in some when selected. Provides a visual interface preferred by many. You will be able to configure the Full Wysiwyg Editor options in a next wizard page.

Click to expand

1.1.6. Set up Wysiwyg editor

Close Back Save and Continue

Show on admin login

Set up Wysiwyg editor

You can choose to use by default the 'Compatible' Wiki mode (content is saved in wiki syntax), or the HTML mode.

Wiki editor setup

Select the Wysiwyg editor mode

- ☒ Compatible Wiki mode
Use wiki syntax for saved pages.
This is the most compatible with Tiki functionality and the most stable editor mode.
Tools and functions in the editor toolbar will be limited.
☒ Full Wysiwyg Editor is displayed by default ⓘ
- ☐ HTML mode
Use HTML syntax for saved pages.
Best compatibility with inline editing. Loses some wiki related features, such as SlideShow, and has some problems with SEFURL.
Full editor toolbar.
☒ Full Wysiwyg Editor is optional ⓘ
- ☐ Inline Wysiwyg editor ⓘ ⓘ

See also [Wysiwyg admin panel](#)

Click to expand

1.1.7. Set up your Text Area

Close Back Save and Continue

Show on admin login

Set up Text Area

Set up the text area environment (Editing and Plugins).

General settings

- ☐ Full Screen ⓘ
- ☒ Toggle display of section and plugin edit icons
- ☒ Syntax Highlighter (CodeMirror) ⓘ
- ☒ Enable edit plugin icons ⓘ
Requires JavaScript
- ☒ Plugin pending approval notification ⓘ
- Syntax Highlighter (CodeMirror) Theme:
Off (but switchable) ⓘ

Global content category system. Items of different types (wiki pages, articles, tracker items, etc) can be added to one or more categories. Permissions set for a category will apply to all items in that category, allowing access to be restricted to certain groups, users, etc.

Categories

Categories are set up in the admin categories panel. Please see the Categories item in the Admin menu.

- Admin Wizard Completed!

Structures organize a group of wiki pages into a tree or book that can be easily navigated by users. Creating a structure is the fastest method for creating multiple pages at once. It's a great way to make a book, as well as to allow users to create new pages that will be automatically found in a common table of contents. New pages can inherit permissions from the structure homepage.

Structures options

☒ Open page as structure ⓘ

☒ Make structure from page ⓘ

☒ Categorize structure pages together ⓘ

☒ MultiPrint ⓘ

☐ Pages not in structure ⓘ

☐ Disable inherited direct object permissions ⓘ

The list of settings shown in the admin wizard may evolve in the future to include other common initial settings in other steps of the admin wizard.

Settings

Admin wizard will be enabled and shown by default for new admins in a brand new Tiki site. Any admin can change this default setting to prevent showing the admin wizard at login time for admins.

You can additionally launch the Admin wizard at any time again through a link in the quickadmin module:
