

Design

-

The site design in Tiki is controlled via [styles and themes](#), many of which come bundled with the software.

When designing your site, please consider using a user-centered design approach to best satisfy the primary needs of your audience.

Themes.tiki.org

[Themes.tiki.org](http://themes.tiki.org) is a resource, download and discussion site for Tiki theme designers. It contains new themes available for download, instructional content, forums, and ways to contact experienced theme designers.
