

# Funcionalidades

TikiWiki es un "sistema de gestión de contenido" (SGC o CMS, de sus siglas en inglés) lleno de funcionalidades — está tan repleto de funcionalidades que puede ser abrumador, incluso para un usuario experimentado o administrador. Por lo tanto, parece adecuado y útil dividir las funcionalidades de TikiWiki en estas categorías generales:

- **Herramientas del Sistema de Gestión de Contenidos** Estas características permiten a los administradores y usuarios crear, mostrar, y mantener contenido accesible por red de todo tipo, incluyendo texto, datos binarios, imágenes, enlaces, y mucho más.
- **Herramientas de organización del Contenido y Ayudas de Navegación** Estas funcionalidades permiten a las personas administradoras y usuarias organizar, estructurar, y presentar contenido de una forma navegable.
- **Herramientas de Comunicación** Estas funcionalidades permiten a las personas administradoras y usuarias comunicarse entre ellas (y con el mundo exterior) por medio de numerosos medios, incluyendo mensajería interna, telefonía de voz, intercambio de datos, y muchos más.
- **Herramientas de Administración** Estas funcionalidades permiten a personas administradoras (y a personas usuarias a quien se les ha asignado los permisos apropiados) administrar todos los aspectos de un sitio basado en Tikiwiki.

## FUNCIONALIDADES DE TIKIWIKI

*Funcionalidad*

*Aplicación típica*

### **Herramientas del Sistema de Gestión de Contenidos**

<a href="#">Articles</a>	Fast-breaking news, announcements
<a href="#">Blog</a>	Online diaries or journals
<a href="#">Charts</a>	Like polls, but more feature-rich; displayed in center column
<a href="#">Comments</a>	User comments that can be appended to articles, Wiki pages, forum posts, and more
<a href="#">Cookie</a>	Taglines drawn randomly from tagline database
<a href="#">Directory</a>	User-submitted Web links
<a href="#">Dynamic Content</a>	Snippets of text or code that can be incorporated by reference
<a href="#">Ephemerides</a>	Content that varies by date
<a href="#">FAQ</a>	Frequently asked questions and answers
<a href="#">Featured Links</a>	External Web pages that open in an iframe
<a href="#">File Gallery</a>	Computer files and software for downloading
<a href="#">Forum</a>	Online discussions on a variety of topics
<a href="#">HTML Pages</a>	Static and dynamic HTML content
<a href="#">Image Gallery</a>	Collections of graphic images for viewing or downloading
<a href="#">Map</a>	Navigable, interactive maps with user-selectable layers

Newsletters	Content mailed to registered users
Polls	Brief list of votable options; appears in module (left or right column)
Quiz	Timed questionnaire with recorded scores
Feeds	Newsfeeds from external Web sites
Surveys	Questionnaire
Trackers	Facts and figures storage & retrieval
Wiki	Collaboratively authored documents
<b>Herramientas de organización del Contenido y Ayudas de Navegación</b>	
Calendar	Show when content was created or modified
Category	Classify content according to subject descriptors
Content Templates	Give a consistent look and feel to Wiki pages.
Hotwords	Automatically attach links to specified words or phrases.
Module	Control appearance and content of boxes that appear in the left and right columns
MyTiki	Provide content organization and communication tools for registered users
Search	Provide full-text search capabilities
Structures	Create hierarchically organized "breadcrumb" navigation aids for Wiki pages
UserMenu	Create custom menus to aid site navigation
Workflow	Control routing of documents based on objectively defined actions.
<b>Herramientas de Comunicación</b>	
Chat	Real-time text chatting
Communication Center	Exchange data with other TikiWiki sites
Live Support	Notify admin by e-mail when a user needs help.
Mail-In	Submit Wiki pages via e-mail.
Messaging	Enable users to send internal messages to each other
Mobile	Make a TikiWiki site accessible to users of Web-enabled cell phones.
Shoutbox	Provide a "graffiti" box on the site's home page.
Tikibot	Respond to data queries originated via IRC.
Voice Tiki	Provide voice-based browsing capability.
Webmail	Give users Web-based access to their POP3 e-mail accounts
<b>Herramientas de Administración</b>	
Admin Drawings	Set up drawing tools for Wiki pages.
Admin DSN	Create links to external databases.
Articles Admin Panel	Configure Articles features.
Backup	Make dumps of TikiWiki's SQL database.
Banners	Insert, track, and manage advertising banners.

<a href="#">Banning</a>	Block access from individual IPs or ranges of IPs.
Blog Admin Panel	Configure Blog features.
<a href="#">Link Cache</a>	Control and flush cached data.
Directory Admin Panel	Configure Directory feature.
<a href="#">Edit Templates</a>	Edit SMARTY templates.
<a href="#">External Wikis</a>	Enable direct links to external Wikis.
FAQs Admin Panel	Configure FAQ feature.
Features Admin Panel	Enable or disable TikiWiki features.
File Galleries Admin Panel	Configure <a href="#">File Gallery</a> feature.
Forums Admin Panel	Configure Forum feature.
General Admin Panel	Set up, name, and configure a TikiWiki site.
<a href="#">Groups</a>	Manage user groups.
Import PHPWiki	Import data from a PHPWiki site.
Image Galleries Admin Panel	Configure <a href="#">Image Gallery</a> feature.
<a href="#">Integrator</a>	Automatically import external HTML pages into the Wiki.
Login Admin Panel	Control user login processes.
Maps Admin Panel	Configure Map feature.
<a href="#">Phpinfo</a>	View PHP information on the server.
Polls Admin Panel	Configure Polls feature.
<a href="#">Toolbar</a>	Define QuickTags for inserting Wiki syntax.
Referrer Stats	View referrer stats.
<a href="#">RSS Config</a>	Configure Feeds feature.
<a href="#">Search Stats</a>	View search stats.
<a href="#">Stats</a>	View site stats.
<a href="#">Theme Control</a>	Assign different themes to various TikiWiki components.
Trackers Admin Panel	Configure Trackers feature.
Users	Manage registered users.
User Files Admin Panel	Establish quotas for user files.
Webmail Admin Panel	Set up Webmail accounts.
Wiki Admin Panel	Configure Wiki features.
